Page

European foreword ... 4

Introduction ... 5

1 Scope ... 6

2 Normative references ... 7

3 Terms, definitions, symbols and abbreviations ... 7
3.1 Terms and definitions ... 7
3.2 Abbreviations ... 10
3.3 Symbols, quantity and dimension ... 10

4 Measured and derived quantities ... 11
4.1 Measured quantities ... 11
4.2 Mandatory derived quantities ... 11
4.3 Optional derived quantities ... 11

5 Metrological characteristics ... 14
5.1 General ... 14
5.2 Accuracy classes ... 14
5.3 Measurement and calibration range ... 16
5.4 Influence quantities ... 17
5.5 Condition of use ... 17

6 Technical requirements ... 18
6.1 Train and vehicle related capability ... 18
6.2 Environmental ... 18
6.3 Inputs and Outputs ... 19
6.4 Descriptive markings ... 23
6.5 Measuring device specific ... 24
6.6 Measuring site specific ... 25

Annex A (informative) Device assessment frame work ... 26

A.1 Introduction ... 26

A.2 Type approval test ... 26

A.3 Initial verification ... 26

A.4 In-service verification ... 26

A.5 Adjustment and verification methods ... 26

Annex B (informative) Measurement site selection criteria ... 27

B.1 Introduction ... 27

B.2 Measurement site ... 27

B.2.1 General ... 27

B.2.2 Approach track and/or leaving track ... 27

B.2.3 Lead-on and/or lead-off track ... 27

B.2.4 Instrumented track 28
B.3 Criteria for site selection 28
B.3.1 General 28
B.3.2 Track structure 28
B.3.3 Track substructure 30
B.3.4 Surroundings 30
B.3.5 Track geometry maintenance limits 30
Annex C (informative) Data exchange format 32
C.1 Introduction 32
C.2 Example 1 32
C.3 Example 2: mandatory values 36
Annex D (informative) Usage of data and accuracy classes 38
D.1 Introduction 38
D.2 Typical applications 38
D.2.1 Monitoring vehicle loading 38
D.2.2 Threshold/Compliance monitoring 38
D.2.3 Track access charging 40
D.2.4 Vehicle condition monitoring 40
D.2.5 Track load monitoring (track maintenance/track renewal forecasting) 40
Bibliography 41
