DIN EN 16843:2024-04 (E)

Railway applications - Infrastructure - Mechanical requirements for joints in running rails

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Symbols and abbreviations 8

5 Requirements 11
5.1 General 11
5.1.1 Design requirements 11
5.1.2 Joint clearance capacity for jointed track 11
5.1.3 Maximum rail length for jointed track 11
5.1.4 Design approval 12
5.2 Performance requirements for insulated rail joints 12
5.2.1 Design requirements 12
5.2.2 Mechanical requirements 13
5.2.3 Electrical insulation requirements 14
5.3 Field test requirements 14

6 Type approval 14
6.1 Overview 14
6.2 Non-insulated rail joints 14
6.3 Insulated rail joints for CWR 14
6.4 Insulated rail joints for jointed track 15

7 Test methods 15
7.1 General 15
7.1.1 Specimens 15
7.1.2 Temperature 15
7.2 Mechanical tests 16
7.2.1 Mechanical strength test (longitudinal) 16
7.2.2 Repeated bending test (vertical) 19
7.3 Electrical insulation tests 21
7.3.1 Test objective 21
7.3.2 Test apparatus 22
7.3.3 Test specimen 22
7.3.4 Test procedure (dry) 22
7.3.5 Test procedure (wet) 23
7.3.6 Test report 23
7.4 Field tests 23

8 Acceptance tests for insulated rail joints 24
8.1 General 24
8.2 Geometrical and visual inspection 24
8.3 Electrical insulation tests (only for prefab construction) 24
8.4 Mechanical tests (only for prefab construction) 24
8.5 Electrical insulation and mechanical tests (only for site construction) 24

9 Identification and marking of insulated rail joints 25

10 Documentation 25

Annex A (normative) Fishplates for mechanical rail joints 26

A.1 Material 26
A.2 Approval 26
A.3 Tolerances 26
A.4 Surface requirements 27
A.5 Identification 28

Annex B (normative) Residual gap test 29

B.1 Test objective 29
B.2 Test apparatus and test specimen 29
B.3 Test procedure 29
B.4 Test report 29
B.5 Relation to other tests 30

Annex C (informative) Design of track with mechanical rail joints 31

Annex D (informative) Static bending test 34

D.1 Test objective 34
D.2 Test apparatus and test specimen 34
D.3 Test procedure 34
D.4 Test report 35
D.5 Relation to other tests 35

Annex E (informative) Formula for bending moment 36

Annex F (informative) Sample values for minimum tensile strength 37

Annex G (informative) Sample values for bending moment 38

Annex H (informative) Values for insulation resistance 40
