ISO 5735-1:2024-03 (E)

Railway infrastructure - Non-destructive testing on rails in track - Part 1: Requirements for ultrasonic testing and evaluation principles

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 General 3

5 Principle of ultrasonic testing in track 3

6 Ultrasonic testing speed and detection of discontinuities 3

7 Simulation of internal reflectors in reference rails 4

Annex A (normative) **Reflectors for reference rails in Europe** 5

Annex B (normative) **Reflectors for reference rails in China** 29

Annex C (normative) **Reflectors for reference rails in Japan** 39

Annex D (informative) **Ultrasonic test areas in rails tested with test vehicles or manually propelled devices** 49
