| European foreword ..... |   | 4           |
| Introduction .....      |   | 5           |
| 1                       | Scope .....   | 5           |
| 2                       | Normative references .....  | 5           |
| 3                       | Terms and definitions .....   | 6           |
| 4                       | Design and manufacture .....  | 7           |
| 4.1                     | General .....   | 7           |
| 4.2                     | Functional requirements .....   | 7           |
| 4.2.1                   | General .....   | 7           |
| 4.2.2                   | Automatic empty-loaded changeover device .....                                      | 8           |
| 4.2.3                   | Pneumatic device characteristics .....  | 9           |
| 4.2.4                   | Automatic hydraulic to pneumatic converter .....                                    | 10          |
| 4.2.5                   | Automatic elastomeric to pneumatic converter .....                                  | 10          |
| 4.2.6                   | Components for operation of the manual empty-loaded changeover device .....         | 10          |
| 4.3                     | Shock and vibration .....   | 11          |
| 4.4                     | Environmental conditions .....  | 11          |
| 4.4.1                   | General .....   | 11          |
| 4.4.2                   | Ambient temperature .....   | 11          |
| 4.4.3                   | Altitude .....  | 11          |
| 4.4.4                   | Humidity .....  | 11          |
| 4.4.5                   | Rain .....  | 12          |
| 4.4.6                   | Snow, ice and hail .....  | 12          |
| 4.4.7                   | Solar radiation .....   | 12          |
| 4.4.8                   | Pollution .....   | 12          |
| 4.5                     | Compressed air quality .....  | 12          |
| 4.6                     | Design requirements regarding pressure stress .....                                 | 13          |
| 4.7                     | Tightness .....   | 13          |
| 4.8                     | Service life .....  | 13          |
| 4.9                     | Fire behaviour .....  | 13          |
| 4.10                    | External appearance .....   | 13          |
| 4.11                    | Colours .....   | 13          |
| 4.12                    | Pneumatic interfaces .....  | 14          |
| 5                       | Type tests .....  | 14          |
| 5.1                     | General .....   | 14          |
| 5.2                     | Individual automatic empty-loaded changeover device type tests .....                | 15          |
| 5.2.1                   | Test bench for individual automatic empty-loaded changeover device type tests ..... | 15          |
| 5.2.2                   | Sampling for type tests .....   | 15          |
| 5.2.3                   | Test requirements .....   | 15          |
| 5.2.4                   | Check of physical and geometrical characteristics .....                             | 16          |
| 5.2.5                   | Tightness .....   | 16          |
| 5.2.6                   | Changeover operation - empty to loaded .....  | 17          |
| 5.2.7                   | Changeover operation - loaded to empty .....  | 18          |
| 5.2.8                   | Response time - empty to loaded .....   | 18          |
| 5.2.9                   | Response time - loaded to empty .....   | 19          |
| 5.2.10                  | Shock and vibration tests .....   | 19          |

|  |  |           |
|--|--|-----------|
| 5.2.11   | Operation at extreme temperatures .....  | 19        |
| 6  | In-service assessment .....  | 20        |
| 7  | Designation .....  | 21        |
| 8  | Identification and marking .....   | 21        |
| 8.1  | Identification .....   | 21        |
| 8.2  | Changeover plate for the manual empty-loaded changeover device .....                   | 21        |
| <b>Annex A (informative) Assessment of an empty-loaded changeover device when fitted to a vehicle</b>  |  | <b>22</b> |
| A.1  | General .....  | 22        |
| A.2  | Design acceptance testing set-up .....   | 22        |
| A.3  | Static testing .....   | 22        |
| A.3.1  | Vehicle requirements .....   | 22        |
| A.3.2  | Test procedures .....  | 22        |
| A.4  | Running tests .....  | 23        |
| A.4.1  | General .....  | 23        |
| A.4.2  | Pneumatic empty-loaded changeover device - Air consumption .....                       | 23        |
| A.4.3  | Pneumatic empty-loaded changeover device - Impact of vibrations on the output signal . | 24        |
| <b>Annex B (normative) Manual empty-loaded changeover device handles and changeover plates</b>   |  | <b>25</b> |
| <b>Annex C (informative) G/P changeover device</b>   |  | <b>32</b> |
| <b>Annex D (informative) Test bench diagram</b>  |  | <b>34</b> |
| <b>Annex E (normative) In-service assessment</b>   |  | <b>35</b> |
| <b>Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive (EU) 2016/797 aimed to be covered</b> |  | <b>36</b> |
