

# DIN EN 15313:2024-12 (E)

## Railway applications - In-service wheelset operation requirements - In-service and off-vehicle wheelset maintenance

---

<b>Contents</b>		<b>Page</b>
European foreword .....		6
Introduction .....		7
1	Scope .....	8
2	Normative references .....	8
3	Terms, definitions, symbols and abbreviated terms .....	9
4	Maintenance .....	11
4.1	General .....	11
4.2	Maintenance organization .....	11
4.2.1	Maintenance organization plan .....	11
4.2.2	Maintenance plan .....	11
4.2.3	Service experience .....	12
4.2.4	Traceability - storage - transportation .....	12
4.3	Equipment and systems .....	14
4.4	Staff certification and competence .....	14
4.5	Qualification of an undertaking for the maintenance of in-service or off-vehicle wheelsets .....	14
5	Definition and illustrations of a wheelset, its associated components and defects .....	15
5.1	Definition and illustrations of a wheelset .....	15
5.1.1	Wheelset .....	15
5.1.2	Axle .....	17
5.1.3	Wheel .....	18
5.1.4	Axlebox .....	19
5.2	Functional references of the rail-wheel interface .....	20
5.2.1	Wheelset functional references .....	20
5.2.2	Wheel functional references .....	21
5.3	Definitions and illustrations of defects .....	21
6	Requirements and operations .....	22
6.1	General .....	22
6.2	Requirements .....	22
6.2.1	In-service limit dimensions and positions .....	22
6.2.2	Special maintenance action for freight wagon axles according to axle load .....	26
6.2.3	Maintenance decision criteria for in-service wheels for all types of wheel .....	27
6.2.4	Maintenance decision criteria for in-service wheels for specific wheel types .....	30
6.2.5	Damage acceptance limits for axle bodies .....	31
6.2.6	Criteria for axlebox (C.5) .....	32
6.2.7	Criteria on wheelsets .....	32
6.2.8	Specific requirements for tyred wheels and resilient wheels .....	33
6.2.9	Limit value for axle wheel seat diameter .....	34
6.3	Reprofiling operation .....	34
6.4	Dimensions after reprofiling .....	35
6.4.1	Front-to-front dimension "a2" .....	35
6.4.2	Diameter difference between wheels on the same axle .....	35
6.4.3	Limit values of radial run-out as a function of the maximum operating speed authorized for the vehicle .....	35

6.4.4	Wheel axial run-out as a function of the maximum operating speed authorized for the vehicle .....	35
6.4.5	Parts of the tread that are not re-profiled .....	35
6.4.6	Radial marks and radial defects on the internal side of the rim .....	36
6.5	Maintenance operations, examinations and inspections .....	36
6.5.1	General .....	36
6.5.2	Detection of tread defects .....	36
6.5.3	Detection of thermal damage on the wheel rim or tyre .....	36
6.5.4	Detection of wheel tread roll-over .....	37
6.5.5	Detection of damage to chamfered corner and flange .....	37
6.5.6	Detection of damage resulting from identification markings .....	37
6.5.7	Detection of defects on the external and internal face of the rim .....	37
6.5.8	Verification of web integrity .....	37
6.5.9	Verification of hub integrity .....	37
6.5.10	Verification of rim integrity - Detection of deep sub-surface tread defects .....	38
6.5.11	Detection of thermal defects on the web of a wheel used as a braking surface .....	38
6.5.12	Detection of overheating affecting the wheel rim-web transition on monobloc wheels .....	38
6.5.13	Verification of axle surface integrity .....	38
6.5.14	Detection of damage caused by corrosion .....	41
6.5.15	Detection of circumferential defects around the whole circumference .....	41
6.5.16	Detection of circumferential defects in a singular section of the circumference .....	41
6.5.17	Detection of notches and impact damage .....	41
6.5.18	Detection of longitudinal defects on axles .....	41
6.5.19	Detection of damage in interference fit zones .....	41
6.5.20	Verification after rectification .....	41
6.5.21	Verification of residual magnetism .....	41
6.5.22	Lubrication operation .....	41
6.5.23	Checking for axlebox defects .....	42
6.5.24	Verification of wheelset electrical resistance after heavy maintenance of wheelsets .....	42
6.6	Requirements for additional maintenance equipment and operations .....	42
7	In-service wheelset maintenance .....	42
7.1	Maintenance plan .....	42
7.2	Wheelset protection during vehicle and bogie cleaning .....	42
8	Off-vehicle wheelset maintenance .....	43
8.1	Maintenance plan .....	43
8.2	Key operations for off-vehicle wheelset maintenance .....	43
8.3	Off-vehicle wheelset cleaning .....	44
8.4	NDT Interval .....	44
9	Action to be taken on any wheelset after an incident in service or when not covered by the maintenance plan .....	44
9.1	Wheelset bearings subject to water ingress .....	44
9.2	Wheelsets having been subjected to a short circuit current (e.g. from falling overhead line equipment, etc.) .....	44
9.3	Detection of a wheel circularity defect by a trackside facility or an onboard monitoring system .....	44
9.4	Wheelsets loaded over the allowed limit .....	44
9.5	Hot axlebox detection .....	45
9.5.1	General .....	45
9.5.2	Technical procedure .....	45
9.6	Derailment .....	45
9.7	Head-on collision .....	46
9.8	Lubricant leakage or loss from the axlebox .....	46
9.9	Thermal overloaded wheels, brake incident (detection of seized brake or discoloration) ..	46
9.10	Reporting after detection of a wheelset irregularity outside the maintenance plan .....	46
10	Equipment not subject to Directive (EU) 2016/797 .....	46
11	Summary table of requirements of this document .....	46
Annex A (normative)	Minimum database content for freight wagon wheelset traceability .....	47

A.1	Data categories for storage time .....	47
A.2	Minimum data to be collected .....	47
A.3	Measures to be applied resulting from lack of traceability .....	52
<b>Annex B (informative) Database content for the traceability of wheelsets of vehicles in the scope of TSI "Rolling stock - Locomotive and passenger rated vehicles" (TSI Loc and Pas) .....</b>		<b>54</b>
B.1	Data categories for storage time .....	54
B.2	Minimum data to be collected .....	54
B.3	Measures to be applied resulting from lack of traceability .....	59
<b>Annex C (normative) Definition and illustration of defects .....</b>		<b>61</b>
C.1	General .....	61
C.2	Defects for all types of wheel .....	61
C.3	Defects specific to wheel types .....	83
C.4	Axle defects .....	87
C.5	Axlebox defects .....	92
C.6	Wheelset defects .....	93
<b>Annex D (normative) Freight stock .....</b>		<b>96</b>
<b>Annex E (informative) Rim size without roll-over for equipment not subject to Directive (EU) 2016/797 .....</b>		<b>97</b>
<b>Annex F (normative) Definitions of Type A and B axles .....</b>		<b>98</b>
<b>Annex G (informative) Permissible circularity defects .....</b>		<b>101</b>
<b>Annex H (informative) Tyred wheels and resilient wheels .....</b>		<b>102</b>
H.1	General .....	102
H.2	Marking of tyred wheels and resilient wheels .....	102
H.3	Tyre thickness of tyred wheels .....	103
H.4	Defects specific to tyred wheels .....	104
H.5	Verification of the electrical resistance during medium and heavy maintenance .....	104
<b>Annex I (normative) Reference images for axle surface condition limits for off-vehicle wheelset maintenance .....</b>		<b>105</b>
I.1	General .....	105
I.2	Local and severe defect .....	105
I.3	Large and heavily corroded areas, strongly and uniformly pitted surface .....	106
I.4	Corrosion defects in abutment area and transition radii .....	106
<b>Annex J (informative) NDT interval .....</b>		<b>108</b>
J.1	General .....	108
J.2	Axle .....	108
J.3	Wheel .....	108
<b>Annex K (informative) Summary of the requirements of this standard for in-service boxed wheelsets .....</b>		<b>109</b>
<b>Annex L (informative) Characteristics of narrow gauge wheelsets .....</b>		<b>111</b>
<b>Annex M (informative) Characteristics of Spanish and Portuguese gauge wheelsets .....</b>		<b>112</b>
<b>Annex N (informative) Characteristics of Finnish and Baltic country gauge wheelsets .....</b>		<b>113</b>
<b>Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive (EU) 2016/797 aimed to be covered .....</b>		<b>114</b>
<b>Bibliography .....</b>		<b>116</b>
