

ISO/TR 8955:2025-03 (E)

Railway infrastructure - Track quality evaluation - Chord-based method

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Symbols and abbreviated terms		2
5 Relationship of measuring systems and evaluation methods for longitudinal level and alignment		3
5.1 Measuring systems.....		3
5.2 Evaluation methods.....		4
5.3 Relationship of measuring systems and evaluation methods.....		4
6 Chord measurement system and chord-based method of longitudinal level and alignment		5
6.1 Chord measurement system.....		5
6.1.1 General.....		5
6.1.2 Symmetrical chord method.....		5
6.1.3 Asymmetrical chord method.....		5
6.2 Transfer function.....		6
6.2.1 General.....		6
6.2.2 Ratio of the chord division.....		7
6.2.3 Chord length.....		10
6.3 Chord based method and chord length class.....		10
6.3.1 Chord based method.....		10
6.3.2 Chord length class.....		11
7 Colouring process		11
7.1 Definition of colouring process.....		11
7.2 Colouring method.....		12
7.2.1 Digital filtering by FIR (finite impulse response).....		12
7.2.2 Digital filtering by IIR (infinite impulse response).....		14
7.2.3 Space domain method.....		14
7.2.4 Frequency domain method.....		14
7.3 Verification of colouring process.....		15
7.3.1 Introduction.....		15
7.3.2 Verification with test signals.....		16
7.3.3 Verification with recorded track geometry data.....		17
8 Recolouring process		18
8.1 Definition of recolouring process.....		18
8.2 Recolouring method.....		20
8.3 Verification of recolouring process.....		20
9 Elimination of influence of track geometry layout		20
10 Usage of restored waveform		21
Annex A (informative) Example of colouring method in MATLAB language		22
Annex B (informative) Verification of colouring/decolouring		30
Bibliography		43
