Nationalforeword 4

National Annex NA (informative) Bibliography 6

Foreword 8

1 Scope 9

2 Normative references 9

3 Termsanddefinitions 9

4 Symbols and abbreviated terms 9

5 General 10

6 Straight grinding wheels, recessed, relieved and hubbed wheels 10
6.1 Relevant shape types according to ISO 525 10
6.2 Straight grinding wheels for general applications 15
6.2.1 Limit deviations TD of the outside diameter, axial run-out tolerance TPL and radial run-out tolerances TRL 15
6.2.2 Limit deviations TH of the hole diameter 15
6.2.3 Limit deviations TP of the recess diameter and assignment of radii R 16
6.2.4 Limit deviations TT, TU of grinding wheel thickness dimensions 16
6.2.5 Limit deviations TE of thickness at bore 17
6.3 Straight grinding wheels for other applications not specified in 6.2 17
6.3.1 Examples of application 17
6.3.2 Limit deviations TD of the outside diameter, axial run-out tolerance TPL and radial run-out tolerance TRL 18
6.3.3 Limit deviations TH of the hole diameter 18
6.3.4 Limit deviations TP of the recess diameters and assignment of radii R 18
6.3.5 Limit deviations TT of the grinding wheel thickness 18
6.3.6 Limit deviations TE of thickness at bore 19
6.4 Grinding wheels for high-pressure grinding 19
6.5 Straight grinding wheels used in sets 19
6.5.1 General 19
6.5.2 Limit deviations TD of the outside diameter 20
6.5.3 Limit deviations TT of the grinding wheel thickness 20
6.6 Cemented or clamped cylinder wheels and disc wheels 20
6.6.1 Relevant shape types according to ISO 525 20
6.6.2 Limit deviations TD of the outside diameter, axial run-out tolerance TPL and radial run-out tolerance TRL 21
6.6.3 Limit deviations TH of the hole diameter 22
6.6.4 Limit deviations TW of the wall thickness 22
6.6.5 Limit deviations TD of the outside diameter of grinding wheel sets 22
6.6.6 Limit deviations TT of the grinding wheel thickness 22

7 Dish and cup wheels 23
7.1 Relevant shape types according to ISO 525 23
7.2 Dish and cup wheels for general applications 24
7.3 Dish and cup wheels for tool and cutter grinding 24

8 Grinding and cutting-off wheels 25
8.1 Relevant shape types according to ISO 525 25
8.2 Limit deviations TD of the outside diameter, axial run-out tolerance TPL, and the radial run-out tolerance TRL 26
8.3 Limit deviations TH of the hole diameter 26
8.4 Limit deviations TT and TU of the grinding wheel thickness 27

9 Segments 27

10 Cones and plugs with threaded insert 29

11 Honingstonesandsuperfinishingstones 32

12 Handfinishingsticks 32

13 Spindle mounted points and wheels 33

Bibliography 35
