

ISO 26202:2019-10 (E)

Magnesium and magnesium alloys - Magnesium alloys for cast anodes

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Designations	1
4.1	Material	1
4.2	Casting process	1
5	Requirements	2
5.1	General	2
5.2	Chemical composition	2
6	Testing	5
6.1	Sampling	5
6.2	Determination of the chemical composition	5
6.3	Electrochemical testing	5
7	Rounding of numbers	5
8	Packaging and surface protection	5
Annex A (normative)	Test method for the determination of the electrode potential of galvanic anodes	6
Annex B (normative)	Test method for the determination of the rate of mass loss of galvanic anodes	8
Annex C (informative)	Cross-references of grade designations of this document to other standard grades of magnesium alloy ingots for cast anodes and magnesium alloys for cast anodes	11
