Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Symbols and abbreviated terms 8
4.1 Symbols 8
4.2 Abbreviated terms 12

5 Principle 12
5.1 General 12
5.2 Principle of flow velocity determination at a point in the duct 13
5.3 Principle of measurement of volume flow rate 13

6 Selection of monitoring approach 15
6.1 Monitoring objective 15
6.2 Choice of technique to determine point flow velocity 16
6.3 Choice of technique for volume flow rate and average flow determination 17

7 Measuring equipment 17
7.1 General 17
7.2 Measurement of duct area 18

8 Performance characteristics and requirements 18

9 Measurement procedure 19
9.1 Site survey before testing 19
9.2 Determination of sampling plane and number of measurement points 19
9.3 Checks before sampling 19
9.4 Quality control 21
9.5 Measurement of flow at locations within the measurement plane 21
9.6 Post-measurement quality control 22

10 Calculation of results 22
10.1 General 22
10.2 Measurement of velocity 22
10.3 Determination of the mean velocity 23
10.4 Correction of average velocity for wall effects 23
10.5 Calculation of the volume flow rate from the average velocity 23
10.6 Conversion of results to standard conditions 24

11 Establishment of the uncertainty of results 25

12 Evaluation of the method 25

Annex A (normative) Measurement of velocity using differential pressure based techniques 27

Annex B (normative) Vane anemometer 39

Annex C (normative) Tracer gas dilution method determination of volume flow rate and average velocity 45

Annex D (normative) Transit time tracer gas method determination of average velocity 51

Annex E (normative) Calculation of flue gas volume flow rate from energy consumption 58

Annex F (informative) Example of uncertainty budget established for velocity and volume flow rate measurements by Pitot tube 66

Annex G (informative) Description of validation studies 77

Annex H (informative) Differential pressure measurement 84

Annex I (informative) The use of time of flight measurement instruments based on modulated laser light 87

Annex J (informative) Relationship between this International Standard and the essential requirements of EU Directives 88

Bibliography 89
