

DIN EN 16253:2013-09 (E)

Air quality - Atmospheric measurements near ground with active Differential Optical Absorption Spectroscopy (DOAS) - Ambient air and diffuse emission measurements

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Terms and definitions	5
3	Symbols and abbreviations	6
3.1	Symbols	6
3.2	Abbreviations	7
4	Principle	7
4.1	General	7
4.2	Configuration of the measurement system	8
4.3	The Beer-Lambert law	9
4.4	Extended Beer-Lambert law	10
4.5	Differential optical density	11
5	Measurement procedure	15
5.1	General	15
5.2	Principle	16
6	Measurement planning	19
6.1	Definition of the measurement task	19
6.2	Selection of measurement parameters of the DOAS system	19
7	Procedure in the field	20
7.1	Installation and start-up of the instrument	20
7.2	Verification of optical properties	21
7.3	Visibility	21
8	Calibration methods	22
8.1	General	22
8.2	Gas cell calibration	22
8.3	Calibration with complete spectral modelling	23
9	Quality assurance	25
9.1	Measurement procedure	25
9.2	Apparent saturation of absorption bands	26
Annex A (informative) Components of the measurement system		27
Annex B (informative) Influence of scattered solar radiation		34
Annex C (informative) Examples of implementations of the DOAS technique		36
Annex D (informative) Performance characteristics		46
Annex E (informative) SI and common symbols and units in spectroscopy		51

Annex F (informative) Application examples	52
Annex G (informative) Example of sample form for a measurement record	80
Bibliography	84
