National foreword 4

National Annex NA (informative) Bibliography 6

Introduction 9

1 Scope 10

2 Normative references 10

3 Terms, definitions, symbols, units, and abbreviations 10
3.1 Terms and definitions 10
3.2 Symbols, units, and abbreviations 12

4 Objectives of odour evaluations and boundary conditions 12
4.1 General 12
4.2 Clarification of the reasons for complaints from room occupants 13
4.3 Determination of odour intensity occurring under special conditions 13
4.4 Identification of sources 13
4.5 Checking the success of remedial activities 13

5 Principle 14

6 Basic principle of the evaluation of indoor air 14
6.1 Evaluation method selection 14
6.2 Combination of evaluation methods 14
6.3 Ways of testing 15
6.4 Selection of the way of testing 15

7 Sensory test methods 16
7.1 Determination of acceptability 16
7.2 Determination of intensity 18
7.3 Determination of the hedonic tone 20
7.4 Odour quality 21

8 Measurement planning and requirements 22
8.1 Selection of panel members 22
8.2 Selection of measuring points 22
8.3 Testing situation 23
8.4 Testing date 24
8.5 Odour-neutral recovery room for the panel 24
8.6 Sampling 24
8.7 Preparation of the testing log 25

9 Conducting the experiment 25
9.1 Preparation 25
9.2 On-site odour testing 25
9.3 Sampling and evaluation in the laboratory 26

10 Assessment 27
10.1 Accuracy of the sensory assessments 27
10.2 Interpretation of the results 28

11 Documentation 28

Annex A (normative) Training procedure for intensity assessments using a comparative scale 29

Annex B (informative) Training procedure -- Verification of olfactory function 33

Annex C (informative) Description of one possibility of a sampling and presenting device for air samples out of emission chambers 35

Annex D (informative) Example for the set-up of a comparative scale 38
