

# DIN EN 19694-2:2016-10 (E)

## Stationary source emissions - Greenhouse Gas (GHG) emissions in energy-intensive industries - Part 2: Iron and steel industry

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	7
3	Terms and definitions .....	7
4	Abbreviations .....	8
5	Scope of reporting for the iron and steel industry .....	9
5.1	Plants, processes and boundaries .....	9
5.2	Products and by-products .....	11
5.3	Energy, utilities and other materials .....	12
5.4	Greenhouse gases in the steel industry .....	12
5.5	Processes and reference products .....	12
5.6	Units .....	13
6	Basic principles of CO <sub>2</sub> emission determination .....	13
6.1	General .....	13
6.2	Principle of the carbon mass balance .....	14
6.3	Determination of activity data .....	14
6.4	Determination of emission factors .....	14
7	Determination of CO <sub>2</sub> emissions at facility level .....	16
8	Assessment of CO <sub>2</sub> emission performance .....	19
8.1	Assessment of CO <sub>2</sub> impact of a facility, including process emissions .....	19
8.2	Assessment of actual CO <sub>2</sub> impact of a facility .....	19
8.3	Indicator-based assessment of CO <sub>2</sub> emission performance .....	20
9	Determination of CO <sub>2</sub> reference values .....	32
10	Assessment of data quality .....	33
10.1	Preliminary checks to detect unrealistic data .....	33
11	Uncertainty assessment .....	35
11.1	General .....	35
11.2	Uncertainty of activity data .....	35
11.3	Uncertainty of carbon content .....	35
11.4	Determination of uncertainty of CO <sub>2</sub> emissions for individual sources .....	36
11.5	Uncertainty of total direct emissions for a facility .....	37
Annex A (informative) Definition of the technical boundaries of processes .....		38
Annex B (informative) Products and by-products of the iron and steel Industry .....		45
Annex C (informative) Default values for emission factors and upstream data .....		52

<b>Annex D (informative) Examples of application of carbon mass balance methodology .....</b>	<b>55</b>
<b>Annex E (informative) Assessment of emission performance at facility level (carbon input performance) .....</b>	<b>60</b>
<b>Annex F (informative) Determination of process performance .....</b>	<b>64</b>
<b>Annex G (informative) Description of data checks on process data .....</b>	<b>69</b>
<b>Annex H (informative) Elements on sampling, analyses and uncertainty .....</b>	<b>73</b>
<b>Bibliography .....</b>	<b>80</b>
