DIN EN 19694-3:2016-10 (E)

Stationary source emissions - Determination of greenhouse gas (GHG) emissions in energy-intensive industries - Part 3: Cement industry

Contents

Page

European foreword 4

Introduction 5

1 Scope 9

2 Normative references 9

3 Terms and definitions 9

4 Symbols and abbreviated terms 12

5 Determination of GHGs based on the mass balance method 13
5.1 General 13
5.2 Major GHG in cement 14
5.3 Determination based on mass balance 14
5.4 Determination by stack emission measurements 14
5.5 Gross and net emissions 14

6 System boundaries 21
6.1 General 21
6.2 Operational boundaries 21
6.3 Organizational boundaries 22

7 Direct GHG emissions and their determination 25
7.1 General 25
7.2 CO2 from raw material calcinations 28
7.3 Reporting of CO2 emissions from raw material calcination based on clinker output: summary of IPCC and CSI recommendations and default emission factor for clinker 37
7.4 Determining the FD calcination rate 38
7.5 Direct determination of the CO2 emission factor of FD from analysis of CO2 content 39
7.6 Cement specific issues for fuels 39
7.7 GHG from fuels for kilns 41
7.8 GHG from non-kiln fuels 41
7.9 GHG from the combustion of wastewater 42
7.10 Non-CO2 GHG emissions from the cement industry 42

8 Energy indirect and other indirect GHG emissions and their determination 43
8.1 General 43
8.2 CO2 from external electricity production 43
8.3 CO2 from bought clinker 44

9 Baselines, acquisitions and disinvestments 44

10 Reporting 45
10.1 General 45
10.2 Corporate environmental reporting 45
10.3 Reporting periods 46
10.4 Performance indicators 47

11 Uncertainty of GHG inventories 53

11.1 Introduction to uncertainty assessment 53
11.2 Uncertainty of activity data 56
11.3 Uncertainties of fuel and material parameters 56
11.4 Uncertainties of continuous stack emission measurements 57
11.5 Evaluation of the overall uncertainty of a GHG inventory 58
11.6 Application of default values instead of analysing results 58

12 Considerations for applying this standard (verification procedure) 59

Annex A (informative) Findings from the field tests (analytical interferences) 61

Annex B (informative) Emission factors 65

Annex C (informative) Uncertainty of activity data 67

Annex D (informative) Overview on terms in a cement plant 73

Bibliography 75
