DIN EN 16841-1:2017-03 (E)

Ambient air - Determination of odour in ambient air by using field inspection - Part 1: Grid method

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols and abbreviations 9

5 Principle of measurement 10

6 Coordinator, assessors and panel members 14
6.1 Measurement leader and field observations coordinator 14
6.2 Assessors and panel members 14
6.3 Panel instruction 15

7 Planning of measurements and measurement procedure 16
7.1 Health and safety 16
7.2 Planning and performance of the field survey 16

8 Data recording and calculation 25
8.1 Data recording and calculating the percentage odour time 25
8.2 Criterion for positive single measurement (odour hour) 25
8.3 Calculation of the odour hour frequency 25

9 Measurement uncertainty 27
9.1 General aspects 27
9.2 Calculation of the uncertainty of the odour hour frequency in an assessment square 28

10 Reporting of results 29

Annex A (informative) Overview and interaction of existing odour measurement methods 31

Annex B (informative) Training of assessors and instructions prior to grid measurements 32

Annex C (informative) Examples for instructions and sheets 35

Annex D (informative) Example of the planning and evaluation of a grid measurement 38

Annex E (informative) Example for check of temporal representativeness 43

Annex F (informative) Example for check of spatial meteorological representativeness 45

Annex G (informative) Evaluation of odour hours and odour frequencies per assessment square 47

Annex H (informative) Calculation of the uncertainty of a grid measurement 51
