Indoor air - Part 33: Determination of phthalates with gas chromatography/mass spectrometry (GC/MS)

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Sampling methods and analytical apparatus	2
4.1	General	2
4.2	Sampling by adsorption with subsequent thermal desorption	2
4.2.1	Apparatus, operating materials and chemicals	2
4.2.2	Preparation of the thermal desorption tube	3
4.2.3	Sampling	3
4.3	Sampling by adsorption and subsequent solvent extraction	4
4.3.1	Apparatus, operating materials and chemicals	4
4.3.2	Preparation of Florisil®2) and the adsorption tubes	5
4.3.3	Hints to the application of Florisil®2)	6
4.3.4	Sampling	6
4.3.5	Sample conditioning	7
5	Calibration	7
5.1	General	7
5.2	Calibration of the thermal desorption method	8
5.3	Calibration of the solvent extraction method	8
6	Identification and quantification	8
6.1	Mass spectrometric analysis	8
7	Establishment of calibration curves and calculation of the analyte mass	14
7.1	Establishment of calibration curves	14
7.2	Calculation of the analyte mass	14
8	Calculation of indoor air concentrations	15
9	Performance characteristics	16
9.1	Detection limit	16
9.2	Quantification limit and problems related to the blank values	16
9.3	Reproducibility standard deviation and repeatability standard deviation	17
10	Quality assurance	19
10.1	Method verification and determination of blanks	19
10.1.1	Field blank value of the indoor air	19
10.1.2	Analytical laboratory blank value	19
10.2	Measures for blank value minimization	19
10.3	Documents	20
11	Interferences	20

Annex A (informative) General information on phthalates	21
Annex B (informative) Screening phthalates in solvent wipe tests	24
Annex C (informative) Screening phthalates in house dust	27
Annex D (informative) Practical example for the calibration of the thermal desorption method	31
Annex E (informative) Practical example for the calibration of the solvent extraction method using Florisil®2)	33
Annex F (informative) Practical example for the gas chromatography with thermal desorption	35
Annex G (informative) Practical example for the gas chromatography following solvent extraction .	36
Annex H (informative) Problems related to the blank values	37
Annex I (informative) Example of a sampling protocol	38
Bibliography	39
