

ISO 16000-36:2018 (E)

Indoor air — Part 36: Standard method for assessing the reduction rate of culturable airborne bacteria by air purifiers using a test chamber

Contents

| | |
|---------|---|
| | Foreword |
| | Introduction |
| 1 | Scope |
| 2 | Normative references |
| 3 | Terms and definitions |
| 4 | Principle |
| 5 | Apparatus and materials |
| 5.1 | Apparatus |
| 5.2 | Materials |
| 5.2.1 | Test bacteria |
| 5.2.2 | Culture media and reagents |
| 5.2.2.1 | General |
| 5.2.2.2 | Nutrient broth |
| 5.2.2.3 | Nutrient agar |
| 5.2.2.4 | Physiological saline solution |
| 6 | Preparation of the stock cultures and working cultures of the test bacteria |
| 6.1 | Preparation and maintenance of stock culture |
| 6.2 | Preparation and maintenance of working cultures of the test bacteria on agar plates |
| 6.3 | Preparation of working culture suspensions |
| 7 | Procedures |
| 7.1 | General |
| 7.2 | Step 1 — Measurement of the concentration of culturable test bacteria, c_i , without operating the air purifier |
| 7.2.1 | General |
| 7.2.2 | Preparation of the air purifier and the test chamber |
| 7.2.3 | Measurement of bacterial background concentration in the test chamber |
| 7.2.4 | Nebulizing test bacterial suspension |
| 7.2.5 | Measurement of the initial concentration of culturable bacteria inside the test chamber after nebulizing |
| 7.2.6 | Measurement of the concentration of culturable bacteria inside the test chamber after a defined time |
| 7.2.7 | Post-test actions |
| 7.3 | Step 2 — Measurement of the concentration of culturable test bacteria, c_t , after operating the air purifier |
| 8 | Calculation and expression of results |
| 8.1 | Calculation of the concentration of airborne culturable bacteria |
| 8.2 | Conditions for a valid test |
| 8.3 | Reduction rate of bacteria |
| 9 | Test report |
| 10 | Quality assurance |
| Annex A | (informative) Test chamber |

Annex B (informative) Natural decay rate according to the operating mode of air purifier

Annex C (informative) Homogeneity of airborne culturable bacteria in the test chamber
