

DIN EN 17255-2:2020-07 (E)

Stationary source emissions - Data acquisition and handling systems - Part 2: Specification of requirements on data acquisition and handling systems

Contents		Page
European foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Symbols and abbreviations	8
5	Principles	8
6	Performance requirements	9
6.1	General	9
6.2	Data acquisition	10
6.2.1	Overview	10
6.2.2	Interfaces	10
6.2.3	Manual data input	11
6.2.4	Remote data logger unit	11
6.3	Input data processing	11
6.3.1	Validity of input data	11
6.3.2	First level data (FLD)	12
6.4	Reported data	12
6.4.1	General	12
6.4.2	Warnings, alarms and violations	12
6.5	Reports	12
6.5.1	General	12
6.5.2	Emission reports	13
6.5.3	System reports	13
6.6	Data storage	13
6.6.1	General	13
6.6.2	Time stamping	13
6.6.3	Storage of FLD	13
6.6.4	Storage of STA	13
6.6.5	Storage of standardized STA (SSTA)	14
6.6.6	Storage of validated STA (VSTA)	14
6.6.7	Storage of QAL3 data	14
6.6.8	Storage of warnings, alarms and violations	14
6.6.9	Storage of the event-log and configuration parameters	14
6.7	System functions	14
6.7.1	Event log	14
6.7.2	Configuration	14
6.7.3	Export of data	14
6.7.4	Test mode	15
6.8	Data integrity	15
6.8.1	DAHS availability	15
6.8.2	Tamper-proof data transfer and handling	15
6.8.3	Preventing loss of data	15
6.8.4	Data back-up	15

6.8.5	DAHS identification	16
6.8.6	Time management	16
6.9	Documentation	16
Annex A(informative) Example list of configuration parameters		17
A.1	Measurement channel configuration	17
A.2	Data processing configuration	18
A.3	Data storage configuration	19
A.4	Report configuration	19
Bibliography		20
