DIN EN 16429:2021-05 (E)

Stationary source emissions - Reference method for the determination of the concentration of gaseous hydrogen chloride (HCl) in waste gases emitted by industrial installations into the atmosphere

Contents

Page

European foreword ... 3

Introduction ... 4

1 Scope ... 5

2 Normative references ... 5

3 Terms and definitions ... 5

4 Principle ... 11
4.1 General ... 11
4.2 Measuring principle ... 12

5 Sampling system ... 12
5.1 General ... 12
5.2 Sampling probe ... 12
5.3 Filter ... 12
5.4 Sampling line ... 13
5.5 Conditioning system ... 13
5.5.1 Permeation drier (configuration 1) ... 13
5.5.2 Heated line and heated analyser (configuration 2) ... 13
5.6 Sample pump ... 13
5.7 Secondary filter (optional) ... 13

6 Analyser equipment ... 14

7 Determination of the characteristics of the method: analyser, sampling and conditioning line ... 14
7.1 General ... 14
7.2 Relevant performance characteristics of the method and performance criteria ... 14
7.3 Establishment of the uncertainty budget ... 14

8 Field operation ... 16
8.1 Measurement plan and sampling strategy ... 16
8.2 Setting of the analyser on site ... 17
8.2.1 General ... 17
8.2.2 Preliminary zero and span check, and adjustments ... 17
8.2.3 Zero and span checks after measurement ... 18

9 Ongoing quality control ... 18
9.1 Introduction ... 18
9.2 Frequency of checks ... 19

10 Expression of results ... 19

11 Equivalence of an alternative method ... 20

12 Measurement report ... 20

Annex A (informative) Example of assessment of compliance of non-dispersive infrared method for HCl with requirements on emission measurements ... 21

Annex B (informative) Example of correction of data from drift effect ... 34

Annex C (informative) Validation of the method in the field ... 36

Bibliography ... 42
