# DIN EN 14662-1:2024-05 (E)

## Ambient air quality - Standard method for measurement of benzene concentrations - Part 1: Pumped sampling followed by thermal desorption and gas chromatography

## Contents

Page

European foreword ..... 6

1 Scope ..... 7

2 Normative references ..... 7

3 Terms and definitions ..... 7

4 Method description ..... 11
4.1 Principle ..... 11
4.2 Reagents and materials ..... 11
4.3 Apparatus ..... 13
4.4 Sampler conditioning and blank profiling ..... 17
4.5 Setting of sampling flow rate ..... 18
4.6 Sampling ..... 18

5 Air inlet/manifold sampling equipment ..... 19
5.1 General ..... 19
5.2 Sampling location ..... 19
5.3 Sample delivery ..... 20

6 Type testing ..... 21
6.1 General ..... 21
6.2 Relevant performance characteristics and performance criteria ..... 21
6.3 Type testing programme ..... 24

7 Field operations and ongoing quality control ..... 31
7.1 General ..... 31
7.2 Frequency of calibrations, checks and maintenance ..... 31
7.3 Maintenance of the sampling device ..... 32
7.4 Checks of sampling device sensors ..... 32
7.5 Calibration of sampling device sensors ..... 32
7.6 Checks of the sampling system flow rate ..... 32
7.7 Calibration of the sampling device flow rate ..... 33
7.8 Leak check of the sampling system ..... 33
7.9 Evaluation of sample losses in the sampling device ..... 33

8 Determination of measurement uncertainty ..... 33
8.1 General ..... 33
8.2 Parameters contributing to measurement uncertainty ..... 34

9 Report ..... 35

10 Recommendations for use ..... 35

Annex A (informative) Sorbent selection and characteristics ..... 36

Annex B (informative) Analysis of exposed samples ..... 38

B.1 Safety precautions ..... 38
B.2 Thermal desorption ..... 38

B.3 Determination of desorption efficiency ..... 39
B.4 Calibration ..... 39
B.5 Determination of sample concentration ..... 40
B.6 Calculation of mass concentration of benzene ..... 40

Annex C (informative) Determination of breakthrough volume from gas standards ..... 41

C.1 Reagents ..... 41
C.2 Apparatus ..... 41
C.3 Determination ..... 41
C.4 Calculations ..... 42

Annex D (informative) Determination of breakthrough volumes from extrapolated retention volumes ..... 43

D.1 Apparatus ..... 43
D.2 Reagents ..... 43
D.3 Determination ..... 43
D.4 Expression of results ..... 43

Annex E (informative) Assessment of performance indicators and uncertainty contributions ..... 44

E.1 General ..... 44
E.2 Sample volume ..... 44
E.2.1 General ..... 44
E.2.2 Sample flow calibration and measurement ..... 45
E.2.3 Sampling time ..... 46
E.2.4 Conversion of sampling volume to STP ..... 46
E.2.4.1 Mass-flow controlled sampling devices ..... 46
E.2.4.2 Volume-controlled sampling devices ..... 47
E.3 Desorption efficiency and analytical repeatability ..... 48
E.3.1 Introduction ..... 48
E.3.2 Desorption efficiency ..... 48
E.3.3 Analytical repeatability ..... 48
E.4 Mass of benzene sampled ..... 49
E.4.1 General ..... 49
E.4.2 Sampling efficiency ..... 49
E.4.3 Sample stability ..... 49
E.4.4 Corrections to the measured mass of benzene ..... 50
E.4.4.1 General ..... 50
E.4.4.2 Calibration standards ..... 50
E.4.4.3 Lack-of-fit of calibration function ..... 50
E.4.4.4 Response drift between calibrations ..... 51
E.4.4.5 Selectivity ..... 51
E.4.5 Combined uncertainty in the measured mass of benzene ..... 52
E.4.6 Combined uncertainty in the sampled mass of benzene ..... 53
E.5 Mass of benzene in sample blank ..... 53
E.6 Combined uncertainty in benzene concentration ..... 53
E.7 Expanded uncertainty ..... 54
E.8 Uncertainty from performance requirements ..... 54
E.8.1 General ..... 54
E.8.2 Analyte Ingress from air being sampled ..... 54
E.8.3 Analyte Ingress from Surrounding Air ..... 56
E.8.4 Loss of Retained Analyte ..... 56
E.9 Between-laboratory uncertainty ..... 59
E.10 Example for uncertainty budget calculation ..... 60

Annex F (informative) Reproducibility, validation and comparison exercises ..... 62

Annex G (informative) Performance characteristics ..... 63

G.1 Prior art ..... 63

**G.2 Results of inter-laboratory comparisons ..... 64**

**Annex H (informative) Sampling equipment ..... 66**

**Annex I (informative) Significant technical changes ..... 70**

**Bibliography ..... 71**
