European foreword 5

Introduction 7

1 Scope 10

2 Normative references 10

3 Terms and definitions 10

4 Symbols and abbreviations 18

5 General requirements 20
5.1 Application of performance criteria 20
5.2 Ranges to be tested 21
5.2.1 Certification range 21
5.2.2 Supplementary ranges 21
5.2.3 Lower limit of ranges 22
5.2.4 Expression of performance criteria with respect to ranges 22
5.2.5 Ranges of optical in situ P-AMS with variable optical length 22
5.3 Performance testing of P-AMS based on certified AMS previously tested according to EN 15267-3 22
5.4 Equivalence with the SRM 22
5.5 Manufacturing consistency and changes to P-AMS design 22
5.6 Qualifications of testing laboratories 22

6 Common performance criteria for the laboratory test 23
6.1 P-AMS for testing 23
6.2 Evidence of compliance of legal requirements 23
6.3 Output ranges and zero-point 23
6.4 Operational status signals 23
6.5 Degrees of protection provided by enclosures 23
6.6 Response time 23
6.7 Repeatability standard deviation at zero point 23
6.8 Repeatability standard deviation at span point 24
6.9 Lack of fit 24
6.10 Short-term drift at zero point and at span point 24
6.11 Set-up time after transport and influence of ambient temperature 24
6.12 Influence of supply voltage variations 24
6.13 Influence of vibration 24
6.14 Influence of sample gas pressure for in situ P-AMS 24
6.15 Influence of sample gas flow for extractive P-AMS 25
6.16 Cross-sensitivity 25
6.17 Converter efficiency for P-AMS measuring NOx 25
6.18 Converter efficiency for P-AMS measuring Hg 25
6.19 Response factors for P-AMS measuring TOC 25
6.20 Influences on P-AMS with in-stack sampling chamber 25
6.21 Influences related to storage and transportation 26

7 Common performance criteria for the field test ... 26
7.1 Response time ... 26
7.2 Short-term drift at zero point and at span point ... 26
7.3 Reproducibility ... 26

8 Specific performance criteria for measured components ... 26
8.1 General ... 26
8.2 P-AMS measuring gaseous measured components ... 26
8.2.1 Performance criteria ... 26
8.2.2 P-AMS measuring TOC ... 28
8.2.3 P-AMS measuring Hg ... 29
8.3 P-AMS measuring particulate matter ... 29

9 General test requirements ... 30

10 Test procedures for the laboratory test ... 32
10.1 P-AMS for testing ... 32
10.2 Evidence of compliance of legal requirements ... 32
10.3 Output ranges and zero point ... 32
10.4 Operational status signals ... 32
10.5 Degrees of protection provided by enclosures ... 32
10.6 Response time ... 33
10.7 Repeatability standard deviation at zero point ... 34
10.8 Repeatability standard deviation at span point ... 35
10.9 Lack of fit ... 35
10.10 Short-term drift at zero point and at span point ... 37
10.11 Set-up time after transportation and influence of ambient temperature ... 37
10.12 Influence of supply voltage variations ... 38
10.13 Influence of vibration ... 39
10.14 Influence of sample gas pressure for in situ P-AMS ... 39
10.15 Influence of sample gas flow for extractive P-AMS ... 40
10.16 Cross-sensitivity ... 41
10.17 Converter efficiency for P-AMS measuring NOX ... 42
10.18 Converter efficiency for P-AMS measuring Hg ... 43
10.19 Response factors for P-AMS measuring TOC ... 43
10.20 Influences on P-AMS with in-stack sampling chamber ... 44
10.21 Influences related to storage and transportation ... 44

11 Requirements for the field test ... 44

12 Common test procedures for the field test ... 45
12.1 Response time ... 45
12.2 Short-term drift at zero point and at span point ... 45
12.3 Reproducibility ... 46

13 Equivalence with the SRM ... 46

14 Measurement uncertainty ... 47

15 Test report ... 47

Annex A (informative) European standard reference methods (SRM) and reference methods (RM) .. 49

Annex B (normative) Minimum requirements for a test bench ... 50

Annex C (normative) Interferents ... 51

Annex D (informative) Example for the determination of the expanded uncertainty ... 52

D.1 Determination of uncertainty contributions ... 52
D.2 Elements required for the uncertainty determinations ... 52
D.3 Example of an uncertainty calculation for a P-AMS measuring CO ... 54

D.4 Determination of uncertainty contributions by use of sensitivity coefficients 57

Annex E (normative) Test of linearity 58

E.1 Description of the test procedure 58
E.2 Establishment of the regression line 58
E.3 Calculation of the residuals of the average concentrations 59

Annex F (informative) Elements of a performance test report 60
