ISO/TR 24107:2024-12 (E)

Air quality - Validation of air quality measurement methods in the standardization process

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Abbreviated terms **3**

5 Purposes for validation **4**

6 Objectives for validation **5**

7 Types of validation **5**
7.1 Validation of reference methods 5
7.2 Validation of alternative methods 7
7.3 Validation in the absence of certified reference materials 7

8 Objective, design and documentation of a validation study **8**
8.1 General 8
8.2 Objective of a validation study 8
8.2.1 General 8
8.2.2 Purpose(s) for performing the measurement 8
8.2.3 Representative sampling 8
8.2.4 Sample preparation 8
8.2.5 Analysis 9
8.2.6 Performance characteristics 9
8.2.7 Determination of the result of measurement and the associated measurement uncertainty 9
8.2.8 Documentation and reporting 9
8.3 Design of the validation study 9
8.4 Documentation of the validation study 10
8.4.1 Report on the validation study 10
8.4.2 Storage of results of the validation study 10

9 Examples of validation procedures for specific types of measurement method **11**
9.1 General 11
9.2 Stationary source emissions 11
9.2.1 General 11
9.2.2 Manual measurement methods 11
9.2.3 Automated measurement methods 11
9.2.4 Test bench validation 11
9.2.5 Field test validation 12
9.2.6 Final evaluation 12
9.3 Workplace atmospheres 12
9.4 Ambient atmospheres 12
9.5 Meteorology 12
9.6 Indoor air 12

Annex A (informative) **Stationary source emissions** **14**

Annex B (informative) **Workplace atmospheres** **35**

Annex C (informative) **Ambient atmospheres** **47**
Annex D (informative) **Meteorology** **50**
Annex E (informative) **Indoor air** **51**
Annex F (informative) **Information from other sources** **54**
Bibliography **56**
