

DIN EN 16339:2025-06 (E)

Ambient air - Method for the determination of the concentration of nitrogen dioxide by diffusive sampling

Contents		Page
European foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Description of samplers	8
4.1	Principle	8
4.2	Diffusive samplers	9
4.2.1	Description	9
4.2.2	Preparation	9
4.2.3	Storage of samplers before and after sampling	10
4.2.4	Chemical interferences	10
4.3	Protective devices	10
4.3.1	General	10
4.3.2	Protective shelter	10
4.3.3	Protective filter	11
4.4	Instructions for use	11
5	Analysis	11
5.1	General	11
5.2	Colorimetric method	12
5.2.1	General	12
5.2.2	Calibration	12
5.2.3	Extraction	12
5.2.4	Analysis	13
5.3	Ion chromatography method	13
5.3.1	General	13
5.3.2	Calibration	13
5.3.3	Extraction	13
5.3.4	Analysis	14
6	Calculation of the concentration of nitrogen dioxide	14
6.1	Diffusive sampling rate	14
6.2	Mass concentration	15
6.3	Conversion to standard conditions of temperature and pressure	16
7	Quality control/quality assurance	16
8	Measurement strategy	17
8.1	Calibration of the diffusive sampling rate	17
8.2	Siting criteria	18
8.3	Use of replicates	18
8.4	Exposure	18
8.5	Co-location sites	18
8.6	Auxiliary information	19

9	Performance requirements and measurement uncertainty	19
10	Report	19
	Annex A (normative) Description of tube-type samplers	21
	Annex B (informative) Description of other samplers	27
	Annex C (informative) Estimation of the diffusive sampling rate of the samplers	32
	Annex D (informative) Measurement uncertainty	37
	Annex E (informative) Reagents and equipment for analysis	47
	Annex F (informative) Validation data of the use of protective devices	50
	Bibliography	51
