## Meteorology - Radiosonde - Part 3: Laboratory test method for solar radiation error of temperature sensor in radiosonde

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	2
4	Symbols and subscripts .....	6
4.1	Symbols .....	6
4.2	Subscripts .....	6
5	Technical requirements for the laboratory setup .....	6
5.1	General .....	6
5.2	Open suction-type wind tunnel setup .....	6
5.2.1	General .....	6
5.2.2	Climate chamber .....	7
5.2.3	Dry air generator .....	9
5.2.4	Liquid bath .....	9
5.2.5	Test cell .....	9
5.2.6	Pressure gauges .....	9
5.2.7	Laser Doppler anemometry (LDA) .....	10
5.2.8	Solar simulator .....	10
5.2.9	Vacuum pump .....	10
5.2.10	Sonic nozzles .....	10
5.3	Closed-type wind tunnel setup .....	12
5.3.1	General .....	12
5.3.2	Climate chamber .....	12
5.3.3	Dry air generator .....	12
5.3.4	Liquid bath .....	12
5.3.5	Test cell .....	12
5.3.6	Pressure gauges .....	12
5.3.7	Laser Doppler or sonic anemometry .....	12
5.3.8	Solar simulator .....	12
5.3.9	Vacuum pump .....	12
5.3.10	Fan .....	12
6	Test preparation .....	13
6.1	Environmental conditions .....	13
6.2	Preparation of radiosondes .....	13
6.3	Examination of the laboratory setup .....	13
6.4	Operation of a solar simulator .....	13
6.5	Installation of radiosondes .....	14
6.6	Test conditions .....	15
6.6.1	General .....	15
6.6.2	Sensor boom tilt angle .....	15
6.6.3	Light illumination angle .....	15
6.6.4	Temperature .....	15
6.6.5	Pressure and air ventilation speed .....	16

6.6.6	Solar irradiance .....	16
6.7	Testing sequence .....	16
6.8	Data collection .....	16
6.9	Test finalization .....	17
7	Data processing .....	17
7.1	Determining radiation error from the raw temperature .....	17
7.2	Mathematical measurement model .....	18
8	Evaluation of measurement uncertainty .....	19
8.1	General .....	19
8.2	Equation for combined standard uncertainty .....	19
8.3	Calculation of expanded uncertainty .....	20
9	Method for reporting test results .....	20
Annex A (informative) Analytical functions of radiation error data set .....		21
Annex B (informative) Evaluation of uncertainty of environmental parameters .....		22
Annex C (informative) Application of radiation correction to radiosoundings .....		24
Bibliography .....		28
