## Air quality - Evaluation of the suitability of a measurement procedure by comparison with a required measurement uncertainty

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative reference .....	1
3	Terms and definitions .....	1
4	Symbols and abbreviated terms .....	2
5	Principle .....	4
6	Requirements .....	7
6.1	Methods and materials .....	7
6.2	Performance characteristics .....	7
6.3	Required measurement quality .....	7
7	Required performance related to dynamic conditions .....	7
7.1	General .....	7
7.2	Response time .....	7
8	Required performance related to stationary conditions .....	8
8.1	Analytical function, model function and variance function .....	8
8.2	Identification of sources of uncertainty .....	9
8.3	Assignment of sources of uncertainty to performance characteristics .....	9
8.4	Definition and quantification of conditions of operation of the measurement system .....	10
8.5	Quantification of the impact of selected performance characteristics as partial standard uncertainties .....	11
8.6	Estimation of the combined standard uncertainty .....	14
8.7	Estimation of the expanded uncertainty .....	14
8.8	Evaluation of compliance with the required measurement quality .....	14
9	Field verification .....	14
10	Report .....	15
Annex A (informative) Default ranges of chemical interferents .....		16
Annex B (normative) Coverage factors derived from effective degrees of freedom .....		18
Annex C (informative) Example of an assessment of compliance of UV fluorescence method for SO <sub>2</sub> with requirements on ambient air quality .....		19
Annex D (informative) Examples of field verification programmes .....		24
Bibliography .....		26
