

ISO 12141:2002-11 (E)

Stationary source emissions - Determination of mass concentration of particulate matter (dust) at low concentrations - Manual gravimetric method

Contents		Page
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	4
5	Sampling plane and sampling points	5
6	Apparatus and materials (see summary annex E)	7
7	Calculation of nozzle diameter to obtain weighable quantities of dust	13
8	Weighing procedure	14
9	Sampling procedure	16
10	Thermal behaviour of dusts	18
11	Validation of results	20
12	Calculations	21
13	Performance characteristics of the method	22
14	Test report	23
Annexes A Requirements related to the working platform		25
B	Determination of flow direction with Pitot tubes	26
C	Determination of positions of sampling points in circular and rectangular ducts	27
D	Examples of suitable access ports for sampling equipment	31
E	Proven entry nozzle designs	33
F	Summary of apparatus requirements	35
G	Sampling volume, flowrate and duration	36
H	Examples of weighing bias	37
I	Precision data	39
