Stationary source emissions - Determination of gas and particle-phase polycyclic aromatic hydrocarbons - Part 1: Sampling

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Principles and minimum requirements for the three sampling methods	2
4.1	Principles	2
4.2	General minimum requirements for all sampling methods	2
4.3	General preparation and sampling	3
5	Method A -- Dilution method	4
5.1	Principle	4
5.2	Minimum requirements	4
5.3	Preparation and sampling	5
6	Method B -- (Heated) filter/condenser/adsorber method	7
6.1	Principle	7
6.2	Minimum requirements	7
6.3	Preparation and sampling	7
7	Method C -- Cooled probed/adsorber method	9
7.1	Principle	9
7.2	Minimum requirements	9
7.3	Preparation and sampling	10
Annex A (informative) Applicability of the sampling methods		12
Annex B (informative) Schematic presentations, dimensions and materials of some tested sampling devices		14
Bibliography		25
