ISO 16362:2005-02 (E)

Ambient air - Determination of particle-phase polycyclic aromatic hydrocarbons by high performance liquid chromatography

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Terms and definitions 1

3 Symbols and abbreviated terms 2
3.1 Symbols 2
3.2 Abbreviated terms 2

4 Principle of the procedure 2

5 Reagents, apparatus and materials 2

6 Measurement procedure 5
6.1 Sampling 5
6.2 Sample preparation 5
6.3 HPLC analysis 6

7 Establishment of the calibration function and verification of the measurement values 6
7.1 Identification 6
7.2 Instrument calibration 7
7.3 Determination of response factors and quantification 7
7.4 Determination of the extraction efficiency 9

8 Calculation of the result 9

9 Performance characteristics 9
9.1 Standard deviations of the overall measurement procedure 9
9.2 Detection limits 9

10 Interferences 11

11 Quality assurance 11

12 Test report 12

Annex A (informative) General information 13

Annex B (informative) Examples of operation parameters for HPLC analysis with FLD and DAD in series 14

Annex C (informative) Extraction efficiencies for some PAH compounds 17

Annex D (informative) Results of duplicate measurements 18

Annex E (informative) Comparison measurements and invariance test of the PAH profiles 20

Annex F (informative) Physical constants of PAHs 21

Annex G (informative) List of HPLC columns 25

Bibliography 26
