# DIN EN ISO 9169:2006-09 (E)

## Air quality - Definition and determination of performance characteristics of an automatic measuring system (ISO 9169:2006)

## Contents

Page

Foreword ..... 2

Introduction ..... 3

1 Scope ..... 4

2 Terms and definitions ..... 4
2.1 General terms ..... 4
2.2 Performance characteristics ..... 8

3 Symbols and abbreviated terms ..... 10

4 Terms of reference of the test programme ..... 12

5 Performance characteristics ..... 13
5.1 Basic requirements ..... 13
5.2 Performance characteristics under laboratory conditions ..... 14
5.3 Performance characteristics under field conditions ..... 14

6 Test methods ..... 14
6.1 General requirements ..... 14
6.2 Requirements on the testing laboratory ..... 15
6.3 Response time and minimum averaging time under stable laboratory conditions ..... 15
6.4 Repeatability, lack of fit and limit of detection under stable laboratory conditions ..... 17
6.5 Repeatability of the calibration method specified in the terms of reference under stable laboratory conditions ..... 23
6.6 Drift under stable laboratory conditions ..... 23
6.7 Sensitivity coefficients of interferent influence quantities under stable laboratory conditions ..... 24
6.8 Sensitivity to external influence quantities under stable laboratory conditions ..... 25
6.9 Standard deviation of paired measurements under field conditions ..... 26
6.10 Drift under field conditions ..... 27
6.11 Availability under field conditions ..... 27

7 Test report ..... 27

Annex A (informative) Examples ..... 29

Bibliography ..... 34
