Indoor air - Part 1: General aspects of sampling strategy (ISO 16000-1:2004)

Contents		Page
Foreword		2
Introduction		4
1	Scope	5
2	Normative references	5
3	Special characteristics of the indoor environment	5
4	Measurement objective	7
5	Sampling procedure	7
6	Time of sampling	8
7	Sampling duration and sampling frequency	8
8	Sampling location	10
9	Parallel outdoor air measurements	10
Annex A (informative) Important types of indoor environment and sources of air pollutants		11
Annex B (informative) Sources of indoor air pollutants		12
Annex C (informative) Examples of substances and their sources		14
Annex D (informative) Guidelines for information to be recorded during indoor air measurement		17
Bibliography		25
