Indoor air - Part 1: General aspects of sampling strategy (ISO 16000-1:2004)

Contents	Page
Foreword	2
Introduction	4
1 Scope	5
2 Normative references	5
3 Special characteristics of the indoor environment	5
4 Measurement objective	7
5 Sampling procedure	7
6 Time of sampling	8
7 Sampling duration and sampling frequency	8
8 Sampling location	10
9 Parallel outdoor air measurements	10
Annex A (informative) Important types of indoor environment and sources of air pollutants	11
Annex B (informative) Sources of indoor air pollutants	12
Annex C (informative) Examples of substances and their sources	14
Annex D (informative) Guidelines for information to be recorded during indoor air measurement	17
Bibliography	25
