ISO 9169:2006-07 (E)

Air quality - Definition and determination of performance characteristics of an automatic measuring system

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Terms and definitions 1
2.1 General terms 1
2.2 Performance characteristics 5

3 Symbols and abbreviated terms 7

4 Terms of reference of the test programme 9

5 Performance characteristics 10
5.1 Basic requirements 10
5.2 Performance characteristics under laboratory conditions 11
5.3 Performance characteristics under field conditions 11

6 Test methods 11
6.1 General requirements 11
6.2 Requirements on the testing laboratory 12
6.3 Response time and minimum averaging time under stable laboratory conditions 12
6.4 Repeatability, lack of fit and limit of detection under stable laboratory conditions 14
6.5 Repeatability of the calibration method specified in the terms of reference under stable laboratory conditions 20
6.6 Drift under stable laboratory conditions 20
6.7 Sensitivity coefficients of interferent influence quantities under stable laboratory conditions 21
6.8 Sensitivity to external influence quantities under stable laboratory conditions 22
6.9 Standard deviation of paired measurements under field conditions 23
6.10 Drift under field conditions 24
6.11 Availability under field conditions 24

7 Test report 24

Annex A (informative) Examples 26
