DIN EN 15092:2008-09 (E)

Building valves - Inline hot water supply tempering valves - Tests and requirements

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Materials and surface finishes 7
4.1 General 7
4.2 Nature of materials 7

5 Design and dimensional requirements 8
5.1 Backflow prevention 8
5.2 Dimensional characteristics 8
5.3 Set temperature adjustment 10
5.4 Temperature override function 10

6 Mechanical tests and requirements 10
6.1 Body strength test 10
6.2 Bending moment test for tempering valves 10
6.3 Torque tests for temperature stops 11

7 Performance tests and requirements 12
7.1 General 12
7.2 Standard test conditions 12
7.3 Verification of valve temperature settings 13
7.4 Determination of minimum flow rate 14
7.5 Test for temperature stability starting from ambient 16
7.6 Test for temperature stability with changing flow rates 17
7.7 Test for thermal shutoff with cold water supply failure 18
7.8 Test for temperature stability with changing inlet pressure 18
7.9 Test for temperature stability with changing inlet temperature 19
7.10 Endurance test on the thermostat 20

8 Acoustic tests and requirements 21
8.1 General 21
8.2 Test method 21
8.3 Expression of results 21
8.4 Requirements 21

9 Classification 21

10 Designation 21

11 Marking 22
11.1 Temperature marking 22
11.2 Flow marking 22
11.3 Identification marking 22

12 Instructions 22

Annex A (informative) Apparatus for endurance test on thermostat 24

Annex B (informative) Apparatus for performance test 26

Annex C (normative) Measurement of parameters 28

Annex D (informative) Temperature transient requirements 29

Bibliography 30
