

# DIN EN 816:2017-10 (E)

## Sanitary tapware - Automatic shut-off valves PN 10

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	7
4	Designation .....	7
5	Marking - Identification .....	7
5.1	Marking .....	7
5.2	Identification .....	8
6	Materials .....	8
6.1	Chemical and hygienic characteristics .....	8
6.2	Exposed surface condition and quality of coating .....	8
7	Backflow protection .....	8
8	Dimensional characteristics .....	8
8.1	General .....	8
8.2	Tap with visible body for horizontal surfaces (see Figure 1 and Table 3) .....	9
8.3	Taps with visible body for mounting on vertical surfaces (see Figure 2 and Table 4) .....	10
8.4	In-line tapware with threaded inlet and outlet .....	10
8.4.1	Inlets and outlets aligned (see Figure 3 and Table 5) .....	10
8.4.2	Inlets and outlets at right angles (see Figure 4 and Table 5) .....	11
8.5	Concealed tapware for vertical surfaces .....	11
8.6	Mixer for horizontal surface (see Figures 5, 6 and 7 and Table 6) .....	12
8.7	Mixer with visible body for mounting on vertical surfaces .....	16
8.7.1	Mixers with parallel inlets .....	16
8.7.2	Mixer with opposed inlets (see Figure 11 and Table 5) .....	18
8.8	Nozzle outlets for use with flow rate regulators .....	18
8.9	Special cases .....	18
8.9.1	Special taps and mixers for installation on horizontal surfaces .....	18
8.9.2	Special taps and mixers for installation on vertical surfaces .....	19
9	Leaktightness characteristics .....	19
9.1	General .....	19
9.2	Leaktightness tests .....	19
9.2.1	Principle .....	19
9.2.2	Apparatus .....	19
9.2.3	Leaktightness of tapware upstream of the obturator .....	19
9.2.4	Leaktightness of tapware downstream of the obturator with the obturator open .....	20
9.3	Summary of the leaktightness tests .....	21
10	Pressure resistance characteristics .....	22
10.1	General .....	22
10.2	Test of mechanical behaviour .....	22
10.2.1	Principle .....	22

10.2.2	Apparatus .....	22
10.2.3	Test of the mechanical behaviour upstream of the obturator, with the obturator in the closed position .....	22
10.2.4	Test of mechanical behaviour downstream of the obturator, with the obturator in the open position .....	22
10.3	Summary of the pressure tests .....	23
11	Hydraulic characteristics .....	23
11.1	General .....	23
11.2	Test method .....	23
11.2.1	Principle .....	23
11.2.2	Test apparatus .....	23
11.2.3	Mounting of single self-closing taps .....	26
11.2.4	Mounting of mixers (see Figures 14 a), 14 b) and 14 c)) .....	26
11.3	Principle of the flow test .....	27
11.4	Requirements .....	28
11.4.1	Flow rate .....	28
11.4.2	Flow rate curve .....	28
11.4.3	Flow duration .....	28
11.4.4	Specific characteristics of mixers .....	29
11.4.5	Testing at minimum pressure .....	31
12	Mechanical properties - Operating force .....	31
12.1	General .....	31
12.2	Procedure .....	31
12.3	Requirement .....	31
13	Mechanical endurance or wear resistance characteristics .....	31
13.1	General .....	31
13.2	Procedure .....	31
13.3	Cycle for a single tap .....	32
13.4	Cycle for a mixer .....	32
13.5	Minimum requirements .....	32
14	Acoustic characteristics .....	33
14.1	General .....	33
14.2	Procedure .....	33
14.2.1	Fitting and operating conditions for tapware .....	33
14.2.2	Test method .....	33
14.3	Requirements .....	33
14.3.1	Expression of the results .....	33
14.3.2	Determination of the acoustic group .....	33
14.3.3	Flow class .....	34
Annex A (normative) Pressure take off tees .....		35
Annex B (informative) Acoustic classification (example) .....		37
B.1	Tapware with nozzle .....	37
B.2	Tapware with shower head outlet .....	37
B.3	Tapware with nozzle and shower or shower head outlet .....	37
