DIN EN 16668:2018-05 (E)

Industrial valves - Requirements and testing for metallic valves as pressure accessories (includes Amendment :2018)

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 9

4 Category of valves 10

5 Requirements 10
5.1 Design 10
5.1.1 General 10
5.1.2 Shell design strength 10
5.1.3 Protection against exceeding the allowable limits 11
5.2 Materials 11
5.2.1 General requirements 11
5.2.2 European harmonized standards 11
5.2.3 European approval of materials (EAM) 11
5.2.4 Particular Material Appraisal (PMA) 11
5.2.5 Requirements for prevention of brittle fracture at low temperatures 12
5.2.6 Selection of bolting material 12
5.2.7 Material selection for parts other than shell 12
5.3 Manufacturing 12
5.3.1 Welding 12
5.3.2 Heat treatment 14
5.3.3 Traceability 14
5.3.4 Qualification of non-destructive testing personnel 15
5.4 Non-destructive testing (NDT) 15
5.4.1 Non-destructive testing of steel castings 15
5.4.2 Non-destructive testing of joint welding 15
5.5 Final assessment 15
5.6 Marking 16
5.7 Surface and coating testing 16
5.8 Documentation 16
5.8.1 Documentation for final inspection 16
5.8.2 Accompanying documents 17

Annex A (normative) Classification of valves 18

Annex B (informative) European harmonized standards for materials and components for shell parts 23

Annex C (informative) European Approval of Materials (EAM) 25

Annex D (informative) European harmonized supporting standards for valves 26

Annex E (informative) Non-destructive testing of steel castings 28

E.1 Terms and Definitions 28
E.2 Non-destructive testing of steel castings 28
E.2.1 General 28
E.2.2 Testing procedures 31

Annex F (normative) Non-destructive testing (NDT) of joint welding 36

F.1 General 36
F.2 Non-destructive testing (NDT) extent 36
F.3 Selection of NDT-methods 42

Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2014/68/EU aimed to be covered 43
