|---|---|-------------|
| Foreword .....  |   | 2           |
| Introduction .....  |   | 3           |
| 1   | Scope .....   | 4           |
| 2   | Normative references .....                          | 4           |
| 3   | Terms and definitions .....                         | 4           |
| 4   | Symbols and abbreviations .....                     | 6           |
| 5   | Type test .....                                     | 7           |
| 5.1   | Test conditions .....                               | 7           |
| 5.2   | Test procedures .....                               | 10          |
| 6   | Performances classes .....                          | 13          |
| 6.1   | Classification criteria .....                       | 13          |
| 6.2   | Tightness classes .....                             | 13          |
| 6.3   | Endurance classes .....                             | 14          |
| 6.4   | Temperature classes .....                           | 16          |
| 6.5   | Examples of class designation .....                 | 17          |
| 6.6   | Marking .....                                       | 17          |
| 7   | Reporting .....                                     | 18          |
| 8   | Extension of qualification to untested valves ..... | 19          |
| Annex A (normative) Total leak rate measurement .....                                     |   | 20          |
| Annex B (normative) Leak measurement using the sniffing method .....                      |   | 34          |
| Annex C (informative) Derivation and graphs relating the stem diameter to leak rate ..... |   | 43          |
| Bibliography .....  |   | 51          |
