

ISO/TR 25104:2008-02 (E)

Intelligent transport systems - System architecture, taxonomy, terminology and data modelling - Training requirements for ITS architecture

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols and abbreviated terms	2
5 Subjects for education and training	3
5.1 Background information	3
5.2 What are "Intelligent Transport Systems"?	3
5.3 "User Needs" and "Fundamental Services" requiring ITS	3
5.4 Systems architectures for ITS	4
5.5 Standardization for ITS	4
5.6 Interoperability is important and achievable	5
5.7 Systems engineering for ITS	5
6 Example curricula for training related to ITS architecture and ITS standards	5
6.1 Prerequisite training	5
6.2 Introduction to ITS	5
6.3 ITS technology	6
6.4 ITS theory	6
6.5 Architecture aspects of ITS service provision	7
6.6 Technology aspects of ITS service provision (as they relate to system architecture)	7
6.7 National and regional architecture development	8
6.8 Strategies to use standards in ITS	8
6.9 The process of standards development for ITS	8
6.10 National standards development organizations (SDO) for ITS	9
6.11 Other organizations relevant to ITS standards	9
6.12 Other architecture related issues	9
Bibliography	10
