

ISO/TR 25100:2008-04 (E)

Intelligent transport systems - Systems architecture - Harmonization of ITS data concepts

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Terms and definitions	1
3	Abbreviated terms	1
4	Background issues	2
4.1	Proprietary data concepts	2
4.2	Semantic differences	2
4.3	Structural differences	2
4.4	Difficulty of application of existing data concepts	3
4.5	Report of investigation	3
5	Harmonization -- General discussion	3
5.1	Introduction to harmonization	3
5.2	Illustration of the need for harmonization	3
5.3	Harmonization scenarios in data modelling terms	4
5.4	Iterative harmonization process	6
6	Current approaches to harmonization in ITS International Standards	6
6.1	Three approaches	6
6.2	ISO 14817 harmonization	7
6.3	TBG17 business process & core components	7
6.4	UK Highways Agency, Transport Information Highway (TIH) Metadata registry -- Review guidelines	8
7	Harmonization as a means to improve efficiency	9
8	Conclusions	10
Annex A (informative) Harmonization "Use Case"		11
Annex B (informative) ISO 14817 organization and functional operations		13
Bibliography		15
