ISO 11155-2:2009-01 (E)

Road vehicles - Air filters for passenger compartments - Part 2: Test for gaseous filtration

Contents

Page

Foreword iv

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Measurement accuracy 4
4.1 Flow rate 4
4.2 Pressure 4
4.3 Temperature 4
4.4 Relative humidity 4
4.5 Challenge gas 4

5 General conditions 4
5.1 Conditioning of challenge gas 4
5.2 Cleanliness of influent air 4
5.3 Challenge gas concentration stability 4

6 Test contaminants 5
6.1 Mandatory contaminants 5
6.2 Optional contaminants 5
6.3 Other contaminants 5

7 Test equipment 6
7.1 General layout 6
7.2 Test stand performance 6
7.3 Air supply 6
7.4 Test duct 6
7.5 Contaminant generation and supply 6
7.6 Sampling and analysis of challenge gas 7
7.7 Test equipment constituents 7

8 Experimental determination of t0, using tlag 8

9 Preparation of filter/filter element for testing 8

10 Test methods 8
10.1 Purpose 8
10.2 Air pressure loss 8
10.3 Preparation of challenge gases 9
10.4 Determination of efficiency/breakthrough 9
10.5 Determination of capacity 9
10.6 Data and analysis 9
10.7 Determination of desorption (optional) 10
11 System validation 10
11.1 Air flow uniformity 10
11.2 Verification challenge gas stability (without test filter) 10
12 Test report 11

Annex A (normative) Test stand configuration 12

Annex B (normative) Detailed definition and calculation of t0 and tlag 13

Annex C (normative) Capacity determination 15

Annex D (informative) Conversion of test contaminant concentration units 16

Bibliography 17
