

ISO 11155-2:2009-01 (E)

Road vehicles - Air filters for passenger compartments - Part 2: Test for gaseous filtration

Contents		Page
Foreword		iv
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Measurement accuracy	4
4.1	Flow rate	4
4.2	Pressure	4
4.3	Temperature	4
4.4	Relative humidity	4
4.5	Challenge gas	4
5	General conditions	4
5.1	Conditioning of challenge gas	4
5.2	Cleanliness of influent air	4
5.3	Challenge gas concentration stability	4
6	Test contaminants	5
6.1	Mandatory contaminants	5
6.2	Optional contaminants	5
6.3	Other contaminants	5
7	Test equipment	6
7.1	General layout	6
7.2	Test stand performance	6
7.3	Air supply	6
7.4	Test duct	6
7.5	Contaminant generation and supply	6
7.6	Sampling and analysis of challenge gas	7
7.7	Test equipment constituents	7
8	Experimental determination of t ₀ , using tlag	8
9	Preparation of filter/filter element for testing	8
10	Test methods	8
10.1	Purpose	8
10.2	Air pressure loss	8
10.3	Preparation of challenge gases	9
10.4	Determination of efficiency/breakthrough	9
10.5	Determination of capacity	9
10.6	Data and analysis	9
10.7	Determination of desorption (optional)	10
11	System validation	10
11.1	Air flow uniformity	10
11.2	Verification challenge gas stability (without test filter)	10
12	Test report	11

Annex A (normative) Test stand configuration	12
Annex B (normative) Detailed definition and calculation of t_0 and t_{lag}	13
Annex C (normative) Capacity determination	15
Annex D (informative) Conversion of test contaminant concentration units	16
Bibliography	17
