

# DIN EN 28701:2013-04 (E)

## Intelligent transport systems - Public transport - Identification of Fixed Objects in Public Transport (IFOPT); English version EN 28701:2012

---

Inhalt	Seite
Foreword .....	4
Introduction.....	5
1      Scope .....	7
1.1    General .....	7
1.2    Explicit Exclusions from Scope.....	7
1.3    Exclusions from Terminology.....	8
1.4    Approach – Modularisation .....	8
1.5    Approach – Modelling .....	9
2      Normative references.....	13
3      Terms and definitions .....	13
3.1    Transport Related Terms .....	14
3.2    Communications & Software Concepts .....	27
4      Symbols (and abbreviated terms).....	28
5      Use Cases for Stop Point Data.....	29
5.1    General .....	29
5.2    Use Cases: Timetable Preparation & Scheduling Systems .....	29
5.3    Use Cases: Journey Planning.....	32
5.4    Use Cases: AVMS and Real-time Information Providers .....	35
5.5    Use Cases: Public Transport Operations .....	36
5.6    Use Cases: Urban Traffic Management Control systems .....	36
5.7    Use Cases: Geographic Information Systems .....	36
5.8    Use Cases: Local Authorities.....	37
5.9    Use Cases: Other.....	37
5.10   General Use Cases .....	38
5.11   Excluded Use Cases .....	38
6      Stop Place Model.....	39
6.1    General .....	39
6.2    Physical Models.....	39
6.3    UML Model for Stop Place .....	58
6.4    Navigation Paths .....	87
6.5    Accessibility Navigation .....	95
6.6    Stop Place Model Views.....	103
6.7    On-Street Stop Place View .....	105
6.8    Parking .....	106
6.9    Stop Place Model Summary View .....	108
6.10   Stop Identification .....	109
6.11   Types of Stop Identifier.....	109
6.12   Principles for Issuing Stop Identifiers.....	109
6.13   Principles for Stop Place Identifiers (Normative).....	109
6.14   Discussion of Stop Identifiers, Codes and Labels (Informative).....	110
7      Point of Interest Model.....	115
7.1    General .....	115
7.2    Physical Models.....	115
7.3    UML Model of Point of Interest Model .....	121
8      Topographical Model .....	124

<b>8.1</b>	<b>General.....</b>	<b>124</b>
<b>8.2</b>	<b>Physical Models .....</b>	<b>124</b>
<b>8.3</b>	<b>UML Model of Topographical Model.....</b>	<b>124</b>
<b>9</b>	<b>Administrative Model .....</b>	<b>127</b>
<b>9.1</b>	<b>General.....</b>	<b>127</b>
<b>9.2</b>	<b>Physical models.....</b>	<b>127</b>
<b>9.3</b>	<b>UML Model for Data Administration.....</b>	<b>127</b>
<b>10</b>	<b>Common Modelling Points .....</b>	<b>130</b>
<b>10.1</b>	<b>Relationship to GIS data .....</b>	<b>130</b>
<b>10.2</b>	<b>Common Enumerations .....</b>	<b>131</b>
<b>Annex A (informative) Example of dimensional functions to classify disability included in the FINAL (Complete Integration of Demand Responsive Transport and PT) project in Sweden, as an example of Accessibility Classification of medical conditions .....</b>		<b>137</b>
<b>Bibliography .....</b>		<b>139</b>
