

ISO 16552:2014-07 (E)

Heavy commercial vehicles and buses - Stopping distance in straight-line braking with ABS - Open loop and closed loop test methods

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Principle	2
5	Variables	2
5.1	Reference system	2
5.2	Variables to be measured	3
6	Measuring equipment	3
7	Test conditions	4
7.1	General	4
7.2	Test track	4
7.3	Ambient conditions	4
7.4	Test vehicle	4
8	Test method	5
8.1	General	5
8.2	Performance of the braking procedure	5
9	Data evaluation and presentation of results	6
9.1	General	6
9.2	Stopping distance	7
9.3	Deceleration at full braking (optional)	7
9.4	Braking distance (optional)	8
9.5	Build-up distance (optional)	8
9.6	Lateral deviation, Y1 (optional, for open-loop tests)	8
9.7	Yaw angle deviation, (optional, for open-loop tests)	8
9.8	Steering-wheel angle, H (optional, for closed-loop test)	9
Annex A (normative) Test report -- General data and test conditions		10
Annex B (informative) Test report -- Results		11
Annex C (informative) Brake burnishing and calibrations		14
Annex D (informative) Principle graphs		15
