| Vorwort .....   | 3     |
| Einleitung .....                                      | 4     |
| 1 Anwendungsbereich .....                             | 5     |
| 2 Normative Verweisungen .....                        | 5     |
| 3 Begriffe .....                                      | 5     |
| 4 Abkürzungen.....                                    | 5     |
| 5 Allgemeine Anforderungen an das Bauteil.....        | 6     |
| 5.1 Lebensdauer .....                                 | 6     |
| 5.2 Lagerfähigkeit.....                               | 6     |
| 6 Funktionsbeschreibung.....                          | 6     |
| 7 Technische Anforderungen an den Akku .....          | 6     |
| 7.1 Konstruktive Gestaltung.....                      | 6     |
| 7.2 Anforderungen an Herstellung und Werkstoffe ..... | 7     |
| 7.3 Trockenmittel .....                               | 8     |
| 7.4 Filter und Siebeinsatz .....                      | 8     |
| 8 Betriebsbedingungen.....                            | 8     |
| 8.1 Umgebungsbedingungen .....                        | 8     |
| 8.2 Temperaturen.....                                 | 9     |
| 8.3 Drücke .....                                      | 9     |
| 8.4 Massenstrom .....                                 | 9     |
| 8.5 Ölumlauflauf .....                                | 9     |
| 8.6 Regelverhalten.....                               | 9     |
| 9 Entwicklungsprüfung und Funktionsprüfung .....      | 10    |
| 9.1 Allgemeines .....                                 | 10    |
| 9.2 Gasdichtheit.....                                 | 10    |
| 9.3 Unterdruckfestigkeit.....                         | 10    |
| 9.4 Berstdruckfestigkeit.....                         | 10    |
| 9.5 Druckwechselfestigkeit .....                      | 11    |
| 9.6 Temperaturwechselfestigkeit.....                  | 11    |
| 9.7 Rüttelfestigkeit.....                             | 11    |
| 9.8 Resonanz-Schwingprüfung .....                     | 11    |
| 9.9 Korrosionsbeständigkeit .....                     | 12    |
| 9.10 Dekompressionsprüfung.....                       | 13    |
| 9.11 Funktionsermittlung des AKKU .....               | 13    |
| 10 Serienprüfung.....                                 | 14    |
| 10.1 Allgemeines .....                                | 14    |
| 10.2 Gasdichtheit.....                                | 15    |
| Literaturhinweise.....                                | 16    |

|--|------|
| Foreword.....                                      | 3    |
| Introduction .....                                 | 4    |
| 1 Scope .....                                      | 5    |
| 2 Normative references .....                       | 5    |
| 3 Terms and definitions .....                      | 5    |
| 4 Abbreviations .....                              | 5    |
| 5 General requirements for the component.....      | 6    |
| 5.1 Service life .....                             | 6    |
| 5.2 Storability .....                              | 6    |
| 6 Functional description .....                     | 6    |
| 7 Technical requirements for the ACCU.....         | 6    |
| 7.1 Structural design .....                        | 6    |
| 7.2 Requirements for production and materials..... | 7    |
| 7.3 Drying agents .....                            | 8    |
| 7.4 Filter and sieve insert.....                   | 8    |
| 8 Operating conditions.....                        | 8    |
| 8.1 Environmental conditions.....                  | 8    |
| 8.2 Temperatures .....                             | 8    |
| 8.3 Pressures.....                                 | 9    |
| 8.4 Mass flow.....                                 | 9    |
| 8.5 Oil circulation .....                          | 9    |
| 8.6 Control behaviour.....                         | 9    |
| 9 Development test and functional testing .....    | 9    |
| 9.1 General.....                                   | 9    |
| 9.2 Gas tightness .....                            | 10   |
| 9.3 Negative pressure resistance.....              | 10   |
| 9.4 Burst pressure resistance .....                | 10   |
| 9.5 Pressure cycle resistance.....                 | 10   |
| 9.6 Temperature cycle resistance .....             | 11   |
| 9.7 Vibration resistance .....                     | 11   |
| 9.8 Resonance vibration test .....                 | 11   |
| 9.9 Corrosion resistance.....                      | 12   |
| 9.10 Decompression test .....                      | 13   |
| 9.11 Functional verification of the ACCU .....     | 13   |
| 10 Series testing .....                            | 14   |
| 10.1 General.....                                  | 14   |
| 10.2 Gas tightness .....                           | 14   |
| Bibliography .....                                 | 16   |
