ISO 6621-4:2015-03 (E)

Internal combustion engines - Piston rings - Part 4: General specifications

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Piston ring codes 1

5 Designation of piston rings 4
5.1 Designation elements and order 4
5.2 Designation examples 5

6 Marking of piston rings 6
6.1 General 6
6.2 Mandatory topside identification marking 6
6.3 Additional marking 7

7 General characteristics 7
7.1 Ring shape 7
7.2 Light tightness 8
7.3 Closed gap 8
7.4 Tangential force, Ft, and diametral force, Fd, of single piece piston rings 8

8 Notches for preventing ring rotation 13

9 Machining of surfaces 16
9.1 Peripheral surfaces 16
9.2 Side faces 16
9.3 Other surfaces 16

10 Plated, coated, and treated surfaces 17
10.1 Chromium plating on peripheral surfaces 17
10.2 Spray coated peripheral surfaces 20
10.3 Nitrided surfaces 24
10.4 Treated surfaces 25
10.5 Physical vapour deposition coating (PVD) 26

11 Miscellaneous 27
11.1 Cleanliness 27
11.2 Corrosion protection 27
11.3 Packaging 27

12 Traceability (optional) 27
