

# ISO/TR 17427-3:2015-11 (E)

## Intelligent transport systems - Cooperative ITS - Part 3: Concept of operations (ConOps) for 'core' systems

---

| <b>Contents</b>    |   | <b>Page</b> |
|--------------------|---|-------------|
| Foreword .....     |   | vi          |
| Introduction ..... |   | viii        |
| 1                  | Scope .....   | 1           |
| 2                  | Normative references .....  | 1           |
| 3                  | Terms and definitions .....   | 1           |
| 4                  | Abbreviated terms .....   | 4           |
| 5                  | Using this Technical Report .....   | 5           |
| 6                  | Overview of the role of a 'Core System' in C-ITS .....                                | 5           |
| 6.1                | What is a Concept of operations? .....  | 5           |
| 6.2                | What are the core functions? .....  | 6           |
| 6.3                | Functional subsystems .....   | 6           |
| 6.4                | Institutional context .....   | 7           |
| 6.5                | Specific service features characterizing C-ITS service provision .....                | 8           |
| 6.6                | C-ITS and communication technologies .....  | 10          |
| 6.6.1              | General .....   | 10          |
| 6.6.2              | VANETs, MANETs and 'latency' .....  | 10          |
| 6.6.3              | Hybrid communications .....   | 13          |
| 6.6.4              | Short and medium range communication .....  | 15          |
| 6.6.5              | Long range communication .....  | 16          |
| 6.6.6              | Wide area broadcast .....   | 16          |
| 6.6.7              | Positioning services .....  | 16          |
| 6.6.8              | Digital road map data .....   | 17          |
| 6.7                | Actors involved in C-ITS service provision .....                                      | 17          |
| 6.8                | C-ITS enabling data .....   | 20          |
| 6.9                | Cooperative ITS applications and services .....                                       | 22          |
| 6.9.1              | System of systems .....   | 23          |
| 6.10               | C-ITS Privacy and anonymity .....   | 23          |
| 6.10.1             | Privacy overview .....  | 23          |
| 6.10.2             | Data messages and privacy .....   | 24          |
| 6.10.3             | Security .....  | 25          |
| 6.10.4             | Data management (including capture, storage and access) .....                         | 25          |
| 7                  | 'Core' systems .....  | 26          |
| 7.1                | Core system overview .....  | 26          |
| 7.1.1              | General .....   | 26          |
| 7.1.2              | Single core systems .....   | 27          |
| 7.1.3              | Multiple core systems .....   | 27          |
| 7.1.4              | Other 'Central' systems .....   | 27          |
| 7.1.5              | Facilitate a platform for sharing of information and efficient use of resources ..... | 28          |
| 7.2                | Justification for 'Core Systems' .....  | 28          |
| 7.2.1              | Vision, drivers and objectives .....  | 28          |
| 7.2.2              | Key strategic objectives for the deployment of core system support .....              | 29          |
| 7.2.3              | Key technical objectives for the deployment of core system support .....              | 29          |
| 7.2.4              | Principal elements of a core system .....   | 30          |

|        |   |    |
|--------|---|----|
| 7.2.5  | Proposed features of C-ITS core systems .....   | 31 |
| 7.2.6  | Main mission of the `Core System' .....   | 35 |
| 7.2.7  | Scope of `Core System' services .....   | 36 |
| 7.2.8  | Exclusions from CorSys .....  | 36 |
| 7.2.9  | Probe data storage .....  | 36 |
| 7.2.10 | Roadside equipment (RSE) .....  | 37 |
| 7.2.11 | External support systems (ESS) .....  | 37 |
| 7.2.12 | Communications options .....  | 37 |
| 7.2.13 | Authority/jurisdiction databases .....  | 38 |
| 7.2.14 | Core system stakeholders .....  | 39 |
| 7.2.15 | Core system communications .....  | 39 |
| 7.2.16 | Applications .....  | 42 |
| 7.2.17 | Core system interactions .....  | 42 |
| 7.2.18 | Core system operational goals .....   | 43 |
| 7.3    | `Core system' overview of requirements .....  | 44 |
| 7.3.1  | Definition of a requirement .....   | 44 |
| 7.3.2  | `Core System' requirements identification process .....                               | 44 |
| 7.3.3  | Functional components .....   | 49 |
| 7.4    | Background, objectives and scope of a `Core System' .....                             | 50 |
| 7.5    | Operational policies and constraints .....  | 51 |
| 7.5.1  | Certification .....   | 51 |
| 7.5.2  | Operations and maintenance .....  | 52 |
| 7.5.3  | Security management .....   | 52 |
| 7.5.4  | Data provision/ownership .....  | 52 |
| 7.5.5  | System performance management .....   | 52 |
| 7.5.6  | Flexibility .....   | 53 |
| 7.5.7  | Core system characteristics and environment .....                                     | 53 |
| 7.5.8  | Deployment configurations .....   | 54 |
| 7.5.9  | Deployment footprint .....  | 54 |
| 7.5.10 | Subsystems .....  | 57 |
| 7.5.11 | Subsystem descriptions .....  | 57 |
| 7.6    | Modes of operation .....  | 62 |
| 7.7    | User types and other involved personnel .....   | 64 |
| 7.8    | Operational scenarios .....   | 65 |
| 7.9    | Vehicle-originated broadcast .....  | 66 |
| 7.10   | Infrastructure-vehicle-unicast .....  | 69 |
| 7.11   | Support environment .....   | 71 |
| 7.11.1 | Subsystems .....  | 72 |
| 7.11.2 | Personnel .....   | 72 |
| 7.11.3 | Processes .....   | 72 |
| 7.12   | Disadvantages and limitations .....   | 72 |
| 8      | Example use cases .....   | 73 |
| 8.1    | General .....   | 73 |
| 8.2    | Example Use Case (1): User data exchange .....  | 74 |
| 8.3    | Example Use Case (2): Certificate distribution .....                                  | 75 |
| 8.4    | Example Use Case (3): Certificate revocation list distribution .....                  | 75 |
| 8.5    | Example Use Case (4): Misbehaviour action: Certificate revocation list addition ..... | 76 |
| 8.6    | Example Use Case (5): Data subscription .....   | 77 |
| 8.7    | Example Use Case (6): Remote services .....   | 78 |
| 8.8    | Example Use Case (7): Core service status distribution .....                          | 79 |
| 8.9    | Example Use Case (8): `Core System' operations .....                                  | 80 |
| 8.10   | Example Use Case (9): System expansion .....  | 80 |
| 8.11   | Example Use Case (10): Core discovery .....   | 81 |
| 8.12   | Example Use Case (11): Service data backup .....                                      | 82 |
| 8.13   | Example Use Case (12): Service takeover .....   | 82 |
| 9      | Summary of impacts .....  | 83 |
| 9.1    | Operational impacts .....   | 83 |
| 9.1.1  | Policy .....  | 83 |
| 9.1.2  | System management .....   | 84 |

|       |   |    |
|-------|---|----|
| 9.1.3 | System operation .....  | 85 |
| 9.1.4 | Service receipt .....   | 85 |
| 9.2   | Organizational impacts .....  | 87 |
| 9.2.1 | Policy .....  | 87 |
| 9.2.2 | System management .....   | 88 |
| 9.2.3 | System operation .....  | 89 |
| 9.3   | Impacts during the deployment phases .....                                    | 89 |
| 9.3.1 | System management .....   | 90 |
| 9.4   | Measuring the impacts .....   | 90 |
| 10    | Cooperative vehicle and highway systems policy and institutional issues ..... | 91 |
| 11    | Funding and governance .....  | 91 |
|       | Bibliography .....  | 94 |
