Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Terms and definitions 2

4 Symbols and abbreviated terms 4

5 Service definition and main concepts 4
5.1 General 4
5.2 Service definition 6
5.2.1 Definition 6
5.2.2 Message categories 6
5.2.3 Core services 6
5.2.4 Additional services 7
5.3 Fundamental parameters 7
5.3.1 Spatial relevance 7
5.3.2 Temporal validity 8
5.3.3 Other parameters 9
5.4 Example of system implementation 9
5.4.1 General description 9
5.4.2 Interface identification 10

6 Roles and responsibilities 10
6.1 Scenarios for In-Vehicle Signage 10
6.2 System operation roles in scenario I-I-V 12
6.3 Possible actors in In-Vehicle Signage 13

7 Requirements and recommendations 14
7.1 General 14
7.2 General requirements 14
7.3 Message content 14
7.4 Message management requirements 15
7.4.1 IVS sending ITS station requirements 15
7.4.2 Roadside ITS station 16
7.4.3 IVS receiving ITS station requirements 16
7.4.4 Transmission of IVS information to the HMI control unit 17
7.5 Recommendations for information processing in relation with the presentation to vehicle drivers 18

Annex A (informative) Profile 1 20

Annex B (informative) Profile 2 86

Annex C (informative) Elements about static road signing 90

Annex D (informative) Different technologies and layouts used in VMS 92

Annex E (informative) Topology of the relevance zone of the different road signs 95

Annex F (informative) Elements of data modelling using UML 100
