

ISO 18300:2016-11 (E)

Electrically propelled vehicles - Test specifications for lithium-ion battery systems combined with lead acid battery or capacitor

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	3
5	Type of connection with lithium-ion battery system	3
5.1	Lithium-ion battery pack or system combined with lead acid battery (LIPB)	3
5.2	Lithium-ion battery pack or system combined with electric double layer capacitor energy storage system (LICA)	3
6	General requirements	4
7	Test for LIPB	5
7.1	Pre-conditioning	5
7.1.1	Purpose	5
7.1.2	Procedure	5
7.2	Rated capacity	5
7.2.1	Purpose	5
7.2.2	Procedure	5
7.3	Micro-cycle test	6
7.3.1	Purpose	6
7.3.2	Micro-cycle without regenerative charging	6
7.3.3	Micro-cycle with regenerative charging	7
7.4	Cycle life test	9
7.4.1	Purpose	9
7.4.2	Procedure	9
7.4.3	Requirement	9
8	Tests for LICA	9
8.1	Pre-conditioning	9
8.1.1	Purpose	9
8.1.2	Procedure	9
8.2	Micro-cycle with regenerative test	10
8.2.1	Purpose	10
8.2.2	Procedure	10
8.3	Cold cranking power	10
8.3.1	Purpose	10
8.3.2	Procedure	10
8.3.3	Requirement	11
Annex A (informative)	LICA and LIPB	12
Bibliography		15
