Foreword 5

Introduction 6

1 Scope 8

2 Normative references 8

3 Terms and definitions 9

4 Symbols and abbreviations 12

5 Context of C-ITS 13
5.1 Definition of C-ITS 13
5.1.1 Introduction 13
5.1.2 The European Commission basic definition 14
5.1.3 The vehicle active safety viewpoint 14
5.1.4 The CEN/ETSI/ISO definition 14
5.2 C-ITS role model and business architecture 15
5.2.1 Role model 15
5.2.2 Business architecture 17
5.3 Technical architecture 19
5.3.1 ITS Station architecture 19
5.3.2 ITS communication access technologies 20
5.3.3 Application provisioning and life cycle management 22
5.3.4 Security 23
5.4 Legal aspects and background 23
5.4.1 European action plan and directive for ITS 23
5.4.2 User privacy and data protection 24
5.4.3 Liabilities regarding application performance / suitability for use 24
5.5 Overview of standardization activities 24
5.5.1 Introduction 24
5.5.2 Basic set of ITS applications 25
5.5.3 CEN/TC 278/WG 16 on cooperative systems 26
5.5.4 ISO/TC 204/WG 18 on cooperative systems 26
5.5.5 ISO/TC 204/WG 16 on wide area communications/protocols and interfaces 27
5.5.6 ETSI Technical Committee on ITS (ETSI TC ITS) 27
5.6 Overview of R&D projects and other relevant initiatives 27
5.6.1 CVIS project on cooperative vehicle infrastructure systems 27
5.6.2 SAFESPOT project on road safety related applications 28
5.6.3 eCoMove project on road transport efficiency applications 29
5.6.4 DRIVE C2X project with focus on field trials 29
5.6.5 Car-to-car communication consortium (C2C-CC) 29
5.6.6 EasyWay project on applications for the major EU road network 30
5.6.7 COMeSafety and COMeSafety2 projects on road safety applications 30
5.6.8 Amsterdam Group 30

6 Context of EFC 30
6.1 Definition of EFC 30
6.2 EFC role model and business architecture 31
6.2.1 Role model 31
6.2.2 Business architecture 32
6.3 Technical architecture 33
6.3.1 Overview 33
6.3.2 Communication architecture 35

6.3.3 Autonomous OBE / Front End implementation 36
6.3.4 EFC security 37
6.4 Additional major aspects 38
6.4.1 Interoperability 38
6.4.2 Value added services based on EFC OBE 38
6.4.3 EFC outside Europe 40
6.5 Legal aspects and background 41
6.5.1 Toll domain specific 41
6.5.2 European Electronic Toll Service (EETS) 41
6.5.3 User privacy and data protection 42
6.6 Overview of standardization activities 42
6.6.1 CEN/TC 278/WG 1 on Electronic fee collection and access control applications 42
6.6.2 ISO/TC 204/WG 5 on electronic fee collection and access control applications 42
6.6.3 ETSI Technical Committee for ITS (ETSI TC ITS) 42
6.7 Examples of commercial projects 43
6.7.1 Small EFC system: Herrentunnel Lübeck (Germany) 43
6.7.2 Nationwide EFC system: Germany 43
6.7.3 Interoperable EFC system: EasyGo 44

7 Outline of EFC requirements to an ITS Station 44
7.1 High level EFC requirements 44
7.2 Requirements for the EFC application(s) 46
7.2.1 Detection of Charge Objects (autonomous toll domains) 46
7.2.2 Provision of charge reports (autonomous toll domains) 47
7.2.3 Fee calculation (autonomous toll domains) 48
7.2.4 Generation of charge data (DSRC based toll domains) 48
7.2.5 Location support (autonomous toll domains) 49
7.2.6 Support of enforcement application 49
7.2.7 Operation of an enforcement application 49
7.2.8 Changing variable tariff parameters 50
7.2.9 Feedback to the road user 50
7.3 Resulting requirements for the ITS Station 51
7.3.1 Technical requirements 51
7.3.2 Security requirements 55
7.3.3 Operational requirements 58

8 EFC services in the C-ITS environment 60
8.1 EFC services on ITS Stations 60
8.2 Involved C-ITS sub-roles in the life cycle of EFC services 61
8.2.1 Life cycle of EFC services 61
8.2.2 C-ITS sub-roles involved in different phases of the EFC service life cycle 62
8.3 Combined models of EFC services in C-ITS context 66
8.3.1 C-ITS and EFC role model relations 66
8.3.2 Technical EFC architecture in C-ITS context 68
8.3.3 ITS Station Service Provider 70
8.3.4 Extended EFC role model in C-ITS environment 70
8.3.5 Business architecture 71

9 Considerations on particular implementation aspects 72
9.1 Introduction 72
9.2 Synergies 73
9.3 Particular and critical areas in relation to EFC in an ITS environment 74
9.3.1 Phase of migration from dedicated EFC devices to ITS-S based EFC 74
9.3.2 Resource management 77
9.3.3 Performance monitoring 80
9.4 Suitability for use and certification 81
9.4.1 Introduction 81
9.4.2 Conformity to specifications 82

9.4.3 Suitability for use tests ... 83
9.4.4 Certification ... 83
9.4.5 Registration and Certification Authority ... 84
9.4.6 Quality system approval und surveillance ... 85
9.5 Governance and responsibility ... 85
9.5.1 Introduction ... 85
9.5.2 Application configuration of the ITS Station ... 86
9.5.3 Technical implementation of the ITS Station ... 87
9.5.4 Update and installation of applications ... 88
10 Guidelines for further work ... 89
10.1 Role of EFC to boost the deployment of C-ITS ... 89
10.2 Actions to reduce barriers for the deployment of EFC applications — Create harmonized certification and test rules ... 90
10.2.1 Introduction ... 90
10.2.2 Issuing test rules ... 90
10.2.3 Guidelines on certification and tests ... 91
10.3 Recommendations for further standardization activities ... 91
10.3.1 Recommendations with regard to the area of EFC ... 91
10.3.2 Recommendations with regard to the area of (C-)ITS ... 93
10.4 Best practice ... 94
Annex A (informative) Security Considerations ... 95
A.1 Introduction ... 95
A.1.1 Security areas and targets ... 95
A.1.2 System and application availability and reliability ... 95
A.1.3 Data security ... 95
A.1.4 User privacy protection ... 96
A.2 Security scope of this annex ... 96
A.3 General EFC security considerations ... 96
A.3.1 Security analysis ... 96
A.3.2 Security system ... 98
A.3.2.1 General ... 98
A.3.2.2 Technical security architecture ... 98
A.3.2.3 Organisational security architecture ... 98
A.4 System and application availability and reliability ... 99
A.5 Security of an ITS Station ... 100
A.5.1 General ... 100
A.5.2 Closed ITS Station application platform ... 100
A.5.3 Open ITS Station application platform ... 101
A.6 Summary ... 101
Bibliography ... 102
