

ISO/TS 22239-1:2018-05 (E)

Road vehicles - Child seat presence and orientation detection system (CPOD) - Part 1: Specifications and test methods

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	3
5	Principle	3
5.1	General	3
5.2	Compatibility	4
6	System functionality	6
7	Design recommendations	8
7.1	General	8
7.2	Installation of CPOD resonators into the CRS	8
7.3	Installation of CPOD sensors into passenger seats	11
8	Design requirements	12
8.1	Requirements for CPOD child seats	12
8.2	Requirements for CPOD passenger seats	13
8.2.1	Passenger seat design	13
8.2.2	CPOD sensor	13
8.2.3	Operating range for CPOD passenger seats	13
9	Compatibility measurements	13
9.1	General specification	13
9.2	Compatibility test parameters range	14
9.3	Adjustment of backrest inclination	14
9.3.1	Adjustment of CTB backrest angle,	14
9.3.2	Adjustment of passenger seat backrest angle,	15
9.4	Compatibility measurements for the CRS	16
9.4.1	General compatibility test description	16
9.4.2	Compatibility test (Part 1)	17
9.4.3	Compatibility test (Part 2)	19
9.4.4	CRS functional test	21
9.5	Compatibility measurements for passenger seats	22
9.5.1	General test description	22
9.5.2	Determination of passenger-seat-specific detection/failsafe area	26
9.5.3	Compatibility test procedure for passenger seats	29
9.5.4	Test result interpretation	30
10	Labelling	30
Annex A (normative)	Determination of the passenger seat reference point (CRP)	32

Annex B (normative) Geometrical descriptions	34
Annex C (normative) Detailed specification of the CPOD system functionality	38
Annex D (normative) CPOD child seat compatibility test bench	49
Annex E (normative) CPOD passenger seat compatibility test device	61
Annex F (normative) Additional definitions	65
Annex G (normative) Magnetic coupling factor measurement procedure	70
Bibliography	76
