ISO 19723-1:2018 (E)

Road vehicles — Liquefied natural gas (LNG) fuel systems — Part 1: Safety requirements

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Requirements

- 4.1 Design
- 4.1.1 General
- 4.1.2 Components
- 4.1.2.1 Receptacle
- 4.1.2.2 LNG pressure relief valves (primary and secondary)
- 4.1.2.3 LNG excess flow limiting device
- 4.1.2.4 LNG/CNG valve (automatic)
- 4.1.2.5 LNG check valve or non-return valve
- 4.1.2.6 LNG pressure indicator or fuel indicator
- 4.1.2.7 Vent line or connector
- 4.1.2.8 Venting management system
- 4.1.2.9 Natural gas detector
- 4.2 Refuelling
- 4.2.1 General
- 4.2.2 Receptacle location
- 4.2.3 Receptacle mounting
- 4.2.4 Minimum receptacle clearance
- 4.3 Leakage control
- 4.4 Mounting of the tank(s)
- 4.5 Heat protection
- 4.6 Minimizing risk of gas ignition
- 4.7 Venting system

5 Instruction for use

6 Marking

Annex A (informative) Technical solutions to functional requirements

Annex B (informative) Liquefied natural gas (LNG on board fuel systems)
