

ISO 19723-1:2018 (E)

Road vehicles — Liquefied natural gas (LNG) fuel systems — Part 1: Safety requirements

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Requirements
4.1	Design
4.1.1	General
4.1.2	Components
4.1.2.1	Receptacle
4.1.2.2	LNG pressure relief valves (primary and secondary)
4.1.2.3	LNG excess flow limiting device
4.1.2.4	LNG/CNG valve (automatic)
4.1.2.5	LNG check valve or non-return valve
4.1.2.6	LNG pressure indicator or fuel indicator
4.1.2.7	Vent line or connector
4.1.2.8	Venting management system
4.1.2.9	Natural gas detector
4.2	Refuelling
4.2.1	General
4.2.2	Receptacle location
4.2.3	Receptacle mounting
4.2.4	Minimum receptacle clearance
4.3	Leakage control
4.4	Mounting of the tank(s)
4.5	Heat protection
4.6	Minimizing risk of gas ignition
4.7	Venting system
5	Instruction for use
6	Marking
Annex A	(informative) Technical solutions to functional requirements
Annex B	(informative) Liquefied natural gas (LNG on board fuel systems)
